CLIFFWOOD FARM

Nestled in a fertile vale at the foot of a rock ribbed bluff towering four hundred feet above, lies Cliffwood Farm.

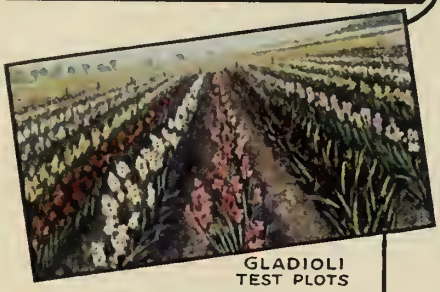

It is here that thousands of trials and tests are made of seeds and plants coming from all parts of the world

These tests are carefully recorded from the appearance of the seed before it enters its earthen bed to the final growth and general appearance of the plant. The plant or stock seed in its development is closely scrutinized for all weaknesses and is not offered to our customers unless it is of a proven variety.

These growing tests overcome the possibility of receiving seed, plants and bulbs which will not bring to the sower or planter the results desired.

Salzer's Garden Seeds are guaranteed to give satisfaction or money will be refunded.

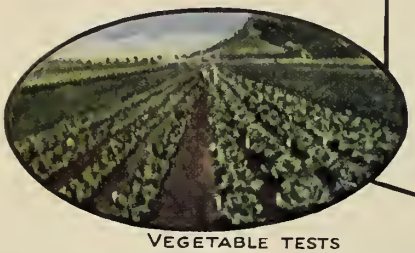

Our desire is to serve efficiently, courteously and supply the best seed, plants and bulbs possible to produce.

THIS GREAT INSTITUTION
at the Service of Seed Buyers

WE have taken this space that could be filled with special seed offers, to show you **that you get something more for your money than just seed, when ordering Salzer's seeds.** What you receive in every package, ounce or bushel of seed ordered from the John A. Salzer Seed Company, besides the exact quantity of seed ordered, is an unexcelled quality, which means that your work in planting and cultivating will produce a bumper crop of prize-winning vegetables and flowers.

Such quality is the basis of our growth from a tiny shed and plot of ground in 1868 to the immense buildings and the vast acres of Cliffwood Farms shown on the opposite page. **Quality has been the watch-word of three generations of seedsmen.** It is quality that can be produced only in Northern Grown seed, thoroughly cleaned by the most modern of machinery, tested and retested by three different methods.

We take this precaution and have invested this immense sum of money in buildings, machinery and land, for only one reason—it pays to maintain the Salzer standard of Quality. You know it would have been impossible for us to hold our customers—some of them have ordered Salzer's seeds for fifty years—to gain thousands of new customers every year, through the recommendation and introduction of our old customers, and to grow to be the largest mail order seed house, if we did not give better quality, better value and better service.

As you look over the other pages and compare the offerings made with any others, **remember that Salzer's Seeds are backed by a reputation for quality of sixty-four years' standing,** by an immense investment in buildings and equipment, by the experience of hundreds of thousands of steady customers in every corner of America. When you "Sow Salzer's Seeds" you will realize what quality seeds mean.

A Thrift Garden This Year

MOTHER EARTH, with her unlimited store of resources, lies waiting and ready to minister to Man with an abundance of fresh vegetables for his table,—to bring forth a steady and a constant supply for use this spring, this summer, next fall, and even for next winter, by storing part of her bounteous yields. **All that she asks in making a drastic cut in your food bill, is that you plant good seed.** Determine to have a garden this year and sow good seed. Sow Salzer's—the best that this world can produce.

Lowest Prices in Our History

NEVER before have we offered our high grade seeds at as low prices as this year. **Quality is first with Salzer's, which is as it should be, and then comes Price.** Save on your seed bill, but do not sacrifice quality! Let Salzer's supply your seed needs this year with the finest seeds grown, at rock-bottom, low, bargain prices.

New Things for You to Grow

SALZER'S history is one of constant advance. We are always among the first to offer new strains that are better than the old. **In looking through this catalog do not overlook our new introductions of overwhelming merit,** such as Golden Gem Sweet Corn, Disease-Resistant Cabbage, Wilt-Resistant Watermelon, Break O'Day Tomato, Wilt-Resistant Asters, etc., etc. They are the latest thing in Horticulture.

Sixty-Four Years of Service

SERVICE in the fullest sense of the word! **It is our constant endeavor to give the utmost in service on every order, whether that order be large or small.** Service, Quality and Price are the three contributing factors that have established the John A. Salzer Seed Co. in its position of foremost among American seedsmen. 1932 marks our Sixty-Fourth Year, not only in selling seeds, but in serving customers in America and Foreign Countries, in all that the word implies.

SALZER'S Stands for Satisfaction

NOTICE the many testimonials throughout our catalog! **None of these are solicited, nor have they been purchased.** Each gives the correct address of the sender and our only regret is that we have not space to print all of those received. We try to give complete satisfaction in every respect, to every customer, whether he purchases much or little.

It Pays to Buy Direct From SALZER'S

IT pays to sow the best seed obtainable, it pays to purchase Salzer's Seeds at their low prices, to have earlier vegetables, to have bigger and heavier yields, to order where the service is unexcelled, to have better and finer flowers, to order from America's largest seedhouse,—in a word, it pays to order from Salzer's!

SOW SALZER'S SEEDS

I sent for one of your Dollar Vegetable Collections two years ago and had splendid results.—Mrs. Cora Christopherson, R. D. 1, Dorchester, Iowa.

SALZER'S EARLIEST ARTICHOKE

This delicious vegetable is a perennial and is cultivated for its flower-heads, which are cooked and prepared like asparagus. Seed should be sown in a bed and the seedlings either left where they are, or transplanted into boxes or pots. The plants produce a fine lot of buds or artichokes, the second year.

11—Pkg., 10c; oz., 29c, postpaid.

Earliest Artichoke

ASPARAGUS

Sow the seed early in the spring in drills, afterwards thinning to three inches apart. The drills should be spaced 12 to 14 inches apart and after plants have grown two full seasons, transplant into rows about four feet apart and about 18 inches between the roots. Use the richest soil you have, and fertilize well.

RUST-PROOF WASHINGTON. 6—Pkg., 10c; oz., 14c; 2 oz., 24c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50, postpaid.

CONOVER'S COLOSSAL. Very rich flavor. Vigorous and tender. Crown does not divide like most types.

3—Pkg., 7c; oz., 12c; 2 oz., 20c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.

CHICORY

WITLOOF-CHICORY OR FRENCH ENDIVE

The plants make a delicious **winter salad,** and are as rank growers as weeds, having made large roots by fall. Grown in the cellar in darkness, these roots produce tender blanched leaves. Sow seed in May, and thin so that plants stand 4 inches apart, in rows 12 to 18 inches apart. Lift the roots in fall and store until wanted for forcing. Then plant the roots in the cellar, upright, 2 inches apart, and in about a month you may cut off the heads with a small portion of the neck and use raw for salad, or boiled. **359—Pkg., 10c; oz., 12c; 2 oz., 18c; ¼ lb., 32c; ½ lb., 60c; lb., $1.15, postpaid.**

LARGE ROOTED OR COFFEE CHICORY. A root grown like the carrot; when dried and roasted, if added to coffee, lends to it strength, richness and flavor. The young leaves make an excellent salad for early spring. **358—Pkg., 8c; oz., 10c; 2 oz., 17c; ¼ lb., 31c; ½ lb., 58c; lb., $1.10, postpaid.**

GEORGIA COLLARDS

This is a type of cabbage widely used where the soil is too poor to grow cabbages. It grows quickly and produces a large quantity of tender foliage on a tall stem. Not in its best condition until touched by frost, and is delicious either boiled like cabbage or in cold slaw. Also much used for winter greens in the South.

364—Pkg., 9c; oz., 11c; 2 oz., 19c; ¼ lb., 35c; lb., $1.25, postpaid.

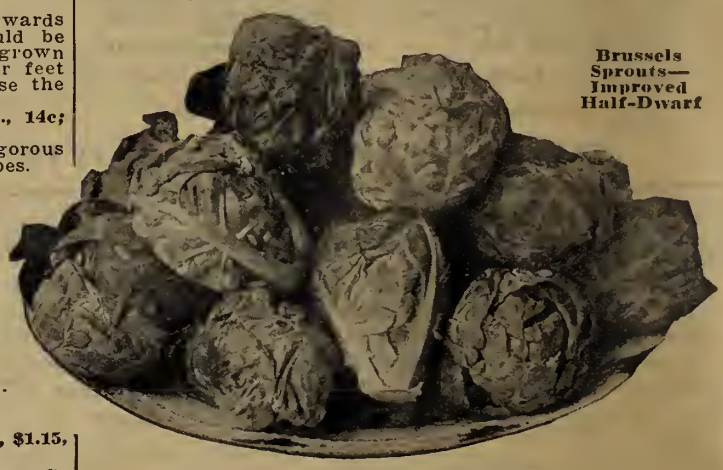

Corn Salad or Fetticus

BRUSSELS SPROUTS

IMPROVED HALF-DWARF—The plants are very hardy and grow from 2 to 3 feet high, bearing a mass of leaves at the top. The main stem is well covered with three or four dozen small cabbage heads, about 2 inches in diameter, which are tightly folded, solid and of exquisite quality. Sow early so as to have well-grown plants by fall. Cultivate the same as for cabbage.

The sprouts resemble miniature cabbages growing closely on the stalk of the plant. They are more tender and delicious than any cabbage. Hard frosts do not injure Sprouts, but improve them, and they are left in the garden until desired for cooking.

207—Pkg., 10c; oz., 18c; 2 oz., 33c; ¼ lb., 61c; ½ lb., $1.16; lb., $2.25, postpaid.

Brussels Sprouts—Improved Half-Dwarf

CORN SALAD OR FETTICUS

Used as **a substitute for lettuce** in early spring and in fall. It is quite hardy and of very rapid growth, producing tender lettuce-like leaves. Does best in cool weather. Sow thinly in rows 10 to 12 inches apart.

431—Pkg., 10c; oz., 14c; 2 oz., 24c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50, postpaid.

CRESS

UPLAND CRESS—A perennial plant that shows its bright green leaves as soon as the snow begins to melt, and is ahead of all other early greens in the spring by fully three weeks.

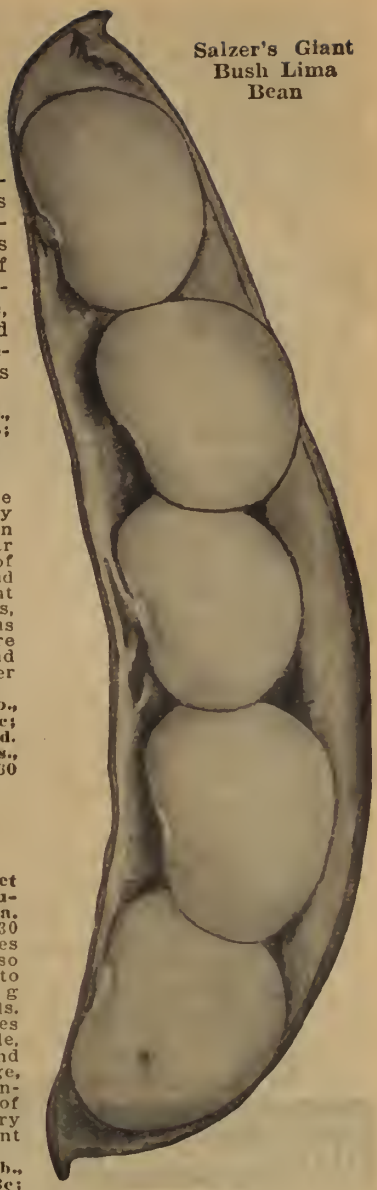

435—Pkg., 10c; oz., 14c; 2 oz., 24c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50, postpaid.

FINE CURLED CRESS—Also known as Pepper Grass. Leaves are finely curled and it is grown extensively for salad. Crisp, pungent flavor. For succession, sow every 10 days from early spring until fall.

433—Pkg., 5c; oz., 9c; 2 oz., 16c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.

I have tried all kinds of seeds but none grow like Salzer's.—Mrs. Albert Baty, R. D. 1, Toppenish, Wash.

SALZER'S GIANT BUSH LIMA BEANS
(BUTTER BEANS)

Salzer's Giant Bush Lima Bean

Enormously productive and bears pods of immense size. Plants are of vigorous growth, with heavy foliage, and of true bush form, the full grown bushes measuring 30 inches in height and 24 inches across the top. Pods are frequently borne in "clusters" of from 5 to 8, are 5 to 6 inches long by 1¼ inches wide, and each one is well filled with large, thick, tender, full-size beans of melting and luscious flavor. It is very early, maturing in about 85 days. A universal favorite, because of its earliness, productiveness, size and fine flavor. Lima Beans should not be planted before the soil has warmed up and the weather is quite settled.

115—Pkg., 10c; ½ lb., 27c; lb., 45c; 2 lbs., 81c; 5 lbs., $1.65, postpaid. Not prepaid, 10 lbs., $2.78; 30 lbs., $7.75; 60 lbs., $14.85.

SMALL BUSH OR SIEVA

Is the smallest but most prolific of all the white seeded varieties, and as they are hardy and very early, are worth growing in the North. Matures in 70 to 78 days. Of true bush growth, the plants bear a tremendous lot of pods 3 inches long and filled with 3 or 4 light green, small, flat beans, of a sweet and delicious flavor. When mature beans are white and keep well for winter shell beans.

116—Pkg., 10c; ½ lb., 22c; lb., 36c; 2 lbs., 63c; 5 lbs., $1.30, postpaid. Not prepaid, 10 lbs., $2.05; 30 lbs., $5.55; 60 lbs., $10.45.

"Daddy Always Sows Salzer's Seeds"

Salzer's Ideal Giant Pole Limas

FORDHOOK BUSH

The only stiffly erect bush form of the popular "Potato" Lima. Plants are 25 to 30 inches high 24 inches across the top and are so strong and erect as to withstand whipping rains and high winds. Pods measure 5½ inches long, 1¼ inches wide, and ¾ inch thick, and contain 4 or 5 large, magnificent beans, tender, melting, sweet, of delicious flavor. Is very early and an excellent cropper.

113—Pkg., 10c; ½ lb., 27c; lb., 46c; 2 lbs., 83c; 5 lbs., $1.69, postpaid. Not prepaid, 10 lbs., $2.85; 30 lbs., $8.00; 60 lbs., $15.35.

SALZER'S IDEAL GIANT POLE

The best main crop pole lima grown. The pods are enormously large, borne in great clusters, and it is extremely productive. Produces bountifully right up to frost. Pods are broad, from 6 to 7 inches in length, packed full of very large beans, tender, finely-flavored, green-whitish, and of best quality. Medium late, an exceptional yielder. **129—Pkg., 10c; ½ lb., 26c; lb., 43c; 2 lbs., 77c; 5 lbs., $1.59, postpaid. Not prepaid, 10 lbs., $2.62; 30 lbs., $7.25; 60 lbs., $13.90.**

EARLY LEVIATHAN POLE

An extremely early, hardy, and prolific bean—the earliest pole lima bean in cultivation. The plants are of strong and vigorous growth, clinging well to the poles, and as it is fully a week earlier than other pole sorts, it can be grown successfully where other pole varieties would be harmed by the early frosts of autumn. It is a prodigious cropper, producing its pods in large clusters from base to top of pole, frequently from 5 to 10 together. Pods are packed with large, thick beans of excellent quality, delicate pale green color, and of a delicious, melting, buttery flavor. Produces not only a large early crop, but bears abundantly throughout the entire season.

125—Pkg., 10c; ½ lb., 24c; lb., 40c; 2 lbs., 71c; 5 lbs., $1.46, postpaid. Not prepaid, 10 lbs., $2.38; 30 lbs., $6.50; 60 lbs., $12.45.

Enormously Prolific, Stringless, Meaty and Tender!

SALZER'S SEEDS ARE PRIZE WINNERS

This comparatively new variety, originated a few years ago by an Eastern grower, is a most valuable acquisition to the garden. Robust in growth, with long pods, entirely stringless, fleshy, and of superb quality. Plants are of erect bush habit, about 18 to 20 inches in height, and are most prolific. **They are free from all diseases; even in wet seasons the foliage seems to be proof against blight, and the pods are always free from rust.** Pods are fleshy, flattened in form, from 6 to 7 inches in length, ¾ inch thick, and ½ inch broad, and of a rich lemon-yellow color. They are remarkable for their brittleness, exceptional flavor, and their absolute freedom from strings. Matures in 45 days.

Mr. Jesse Crum, 2705 Upper Graham Ave., Windber, Pa., writes: **"Your New Stringless Kidney Wax Beans were fine. We picked them fourteen times in a very dry summer."**

Salzer's Red Beauty

Best for Canning

SALZER'S RED BEAUTY

Very early, uniform in size, perfect turnip shape, fine grained, tender, the richest and darkest red of any beet. Salzer's Red Beauty is a mighty good beet to plant and those who have once planted it, see to it that they have some of this fine strain in their garden every year. Its uniformity and its rich, attractive, dark red color sell the beets on sight at market, and for the home garden it not only produces tender, delicious, extremely early beets for table use, but the color is retained when cooked, making them most attractive for both canning and pickling.

Remarkable for its uniform, perfect shape; roots are always smooth, with but a small tap-root, are of medium size, flesh is finely grained, very sweet, always free from woody fibres, and the skin and flesh are **the darkest red of any beet.** The leaves are dark green and shaded with red, are very small and of upright growth, allowing close planting. A heavy cropper, maturing in about 40 days. **166—Pkg., 15c; oz., 19c; ¼ lb., 50c; ½ lb., 94c; lb., $1.75, postpaid.**

Should Be in Every Garden

The Trucker's Favorite

DETROIT DARK RED

Cannot be surpassed for main crop purposes. One of the largest beets grown and a heavy cropper, producing large, globe shaped roots, delicious, tender, and fine grained, small tap-root, and free from any trace of woodiness or stringy tendency. Succeeds equally well at all seasons and is one of the best to sow in spring to succeed the extra early and medium crop sorts.

The skin is an attractive blood-red and the flesh is dark red, slightly zoned with a lighter shade. It is a popular variety for canning retaining its fine color exceptionally well. Leaves are dark green, shaded with red, tops are small and grow upright. The flesh is solid, always tender and of a decidedly sweet flavor. Matures in about 50 days. Most valuable for succession sowings. A great favorite, not only with market gardeners who grow for profit, but likewise with the home gardener who wants large, good beets for his own table use. A splendid beet to store for winter. **Re-selected seed. 159—Pkg., 10c; oz., 12c; ¼ lb., 31c; ½ lb., 58c; lb., $1.10, postpaid.**

With your seeds last year, I had the best garden in my vicinity.—Mr. Frank Watson, R. D. 2, Sterling St., Iron Mountain, Mich.

Salzer's Early Wonder Beets

This extremely early and perfectly shaped beet for bunching purposes was introduced by us in 1926. Its beautiful deep blood-red color, nearly globe-shaped root with almost no lighter zoning in the cross-section of the root, its small sized top and its smooth, clean, and small tap-root makes it a decided asset in the beet family. Matures evenly so that the entire crop may be gathered at one time. It is a very rapid grower, is very quickly in presentable market shape, and because of its early maturity, it can be sown outside as late as July. Matures in 44 days. **Our strain is specially good, extremely early, and very uniform in shape and rich, dark color.**

177—Pkg., 9c; oz., 11c; ¼ lb., 31c; ½ lb., 58c; lb., $1.10, postpaid.

Salzer's Early Wonder Beets

SALZER'S FIREBALL BEETS

A handsome, globe-shaped beet with smooth skin and of an attractive deep blood-red color, which we introduced in 1914. It is fully as early as the old flat Egyptian beets, but is of perfect globe form and much superior in quality, having very fine grained, rich and exceedingly tender flesh of excellent quality. The leaves are small, upright, of rich purple color. The roots are uniform, medium sized, of perfect globe shape, remarkably smooth surface, very small tap-root, and the color of the skin and flesh is a brilliant, fiery red. This intensity of color is retained when cooked, making Fireball highly desirable for canning or pickling. Although very early (quickly reaching a diameter of 2 inches), if left growing, the larger roots retain their fine flavor, tenderness and deep coloring. An ideal beet for either the home garden or the market gardener.

167—Pkg., 10c; oz., 12c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.

Crosby's Egyptian

One of the most extensively grown of any variety of beets, by market gardeners, for whom it has been a great extra early money maker! **It is noted for its handsome form, small tops, very small tap-root, fine quality and quick, rapid growth.** Roots run uniform in size and shape, are rather flattened, turnip shaped, reach a good size, are tender and crisp. Flesh is an attractive dark red color with slightly lighter red zonings. Especially desirable for bunching for the early market. Takes on its turnip shape very early, a decided advantage for forcing for real early market. Highly recommended for the home garden for early table use. Matures in 45 days.

158—Pkg., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.

OTHER SPLENDID BEETS

EDMAND'S EARLY—A good second early variety and fine for winter use. Turnip shaped, skin and flesh dark red, tender, good keeper. 50 to 55 days. **164—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.**

Desirable for bunching, and for second early and main crop. **157—Pkg., 7c; oz., 10c; ¼ lb., 24c; ½ lb., 45c; lb., 85c, postpaid.**

Salzer's Crimson Globe

LONG SMOOTH BLOOD RED—The best winter keeper, bar none! Roots about 12 inches by 2 inches, smooth skin, sweet, tender, dark, blackish red flesh. Requires deep, well-dug, and well manured soil. Often sown in July or August, as a second crop. Very productive. Best for fall and winter use. **171—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.**

Swiss Chard or Spinach Beet

Also known as Sea Kale. Is grown for its stalks and leaves, as it does not make a bulbous, edible root like the other varieties of beets. The leaves grow large and upright and as the outer leaves are cut, more come from the center. Yields a constant crop from July until winter, and can be used all summer when spinach is not available. The mid-rib or center stem of each leaf is large, broad, and white, and after trimming can be cooked and served like asparagus, or made into very good pickles. The leaf part, far superior to ordinary beet tops, is cooked like spinach. Has a delicious and delicate flavor. Gardeners make good money using Swiss Chard as a catch-crop. It gives quick results. Fine for poultry as green feed or pasture.

LUCULLUS. Stalks very large, broad and thick. Leaves tender, heavily crumpled and of fine flavor. **172—Pkg., 10c; oz., 12c; ¼ lb., 28c; ½ lb., 53c; lb., $1.00, postpaid.**

LARGE RIBBED WHITE. Very broad, thick mid-ribs, but the leaves are plain and for this reason preferred by many. Tender, fine quality. **169—Pkg., 7c; oz., 10c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.**

Frost Proof Cabbage Plants

Withstand Frosts and Slight Freezes

Frost Proof Cabbage Plants at Cliffwood Farm in Two Inches of Snow

Produces Cabbages Two to Five Weeks Ahead of Home Grown Plants. Can Be Planted Anywhere Just as Soon as Ground is Soft Enough.

They Surely Are Hardy

If plants cannot be set out the same day received uncrate immediately, dip roots in water and heel out into the ground, spreading bunches a little. Never leave in crate or package.

Set Salzer's hardy cabbage plants out in the open just as soon as you can get them into the ground! No matter if you do expect heavy frosts or some light freezes, if you have planted Salzer's Frost Proof Plants you may rest secure as to the outcome. If the temperature does not go below 20 degrees above zero, we guarantee these plants to live and if any are frozen out we will replace them free of charge or refund your money. Frequently the plants live when the temperature drops nearly to zero.

The market gardener who grows cabbages for shipment or the market, must have extra early maturing crops if he wishes to obtain the highest prices. The home gardener who desires extra earliness and who wants to avoid the trouble of sowing cabbage seed and the necessary protection of early sown seed and plants, will find our frost proof plants to be a great convenience.

Salzer's Frost Proof Cabbage Plants will enable you to have fully matured cabbages three or four weeks earlier than from hot-bed plants. Our growing stations on the Atlantic Coast do not experience the severe weather that prevails in other sections of the country, and here the cabbage seed is sown in the fall and makes a slow, vigorous, hardy growth all winter long in the open ground. These plants can then be set out anywhere, and although the top of the plant does not grow until Spring weather, the roots take hold immediately and develop even though they should be covered with snow. Later when the weather becomes favorable, they make an astonishing growth, due to their early start.

SALZER'S LIGHTNING

Salzer's Disease-Resistant Plants permit cabbage growing on fields that formerly had to be abandoned! If you have had trouble growing cabbages because of diseased soil, we recommend using these plants. Customers from all over the country advise that these plants have given them the first cabbage they have had in years and that they had despaired of ever raising cabbage on their soil. We can supply the following varieties only in disease-resistant plants. Orders must be for 100 of any one variety.

SOW SALZER'S SEEDS

I bought 300 Radio Cabbage Plants from you and set them out on April 19. They all lived and on July 27 I picked and sold cabbage weighing 5¾ lbs. trimmed. Our garden is all from Salzer's Seeds.—Bert C. Merril & Son, Stowe, Vermont.

Received some of your Lightning Cabbage Plants last year and everybody said "They'll die." From 100 plants I raised 68 heads, one of them weighing 15 lbs. all cleaned. Most of them weighed 12 lbs., the smallest not less than 7½ lbs. I am very satisfied with all your seeds.—Carl Nolte, 511 Franklin St., Elgin, Ill.

PLEASE NOTE. **No other varieties supplied except as listed. We cannot sell any one variety of frost proof cabbage plants in less than lots of 100 or except in multiples of 100 no matter how large the order. This means we cannot accept any order for 25 or 50 of one variety and the balance of the 100 in another. Shipment is made when we consider planting conditions best suited to your district or at any time you may specify on your order. Plants are shipped between December 1st and May 31st. They are shipped direct from our growing station and are therefore not sent with seed orders.**

SALZER'S LIGHTNING

One of the most important crops of the Market Gardener is Cabbage. Success in this depends largely upon the quality of seed used. Salzer's Cabbage Seed is the finest grown, having been taken only from carefully selected typical plants, and can be depended upon to grow and produce uniform heads true to name, and in earliness, size, shape, fully equal to the best in the market. First introduced by us in 1889, and pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads in 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are, now depending on our Lightning for their first early crop. It is very hardy, always sure to head and always the **earliest in the market.** The heads are blanched. The plants resist cold and are very hardy, are compact, have but very few outer leaves, can therefore be planted closely together and yield a large crop per acre.

OUR LIGHTNING is ripe and solid when other sorts are still in leaves. It is simply without an equal in earliness, richness and deliciousness of flavor. No vegetable pays better than early Cabbage. None known to the trade is as early as SALZER'S LIGHTNING. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the EARLIEST CABBAGE in the world, you must plant SALZER'S LIGHTNING. See Page 18 for disease resistant seed.

SALZER'S NEW EARLY RADIO

Salzer's Radio is a new, very early, Round Head Cabbage, maturing in 75 days just like Salzer's Famous Lightning, which, however, is a conical head cabbage. **The hard, round cabbages are so very solid that they hardly ever burst.** Plants are very compact, short stemmed and have so few outer leaves that they may be set as close as 8 inches apart. Heads are firm, crisp, solid and have a clear, white heart, which is tender and delicious. Although coming to maturity in 75 days' time, Salzer's Radio Cabbage has made a record of 8 pounds per head in weight. In addition, it is a splendid keeper. The heads are set on shorter stalks than Ballhead, which is preferred by many growers. They are extremely hard and solid, of great weight, sweet flavor, crisp and tender and the heart is beautifully blanched. Our seed is true Danish grown and **produces heads, "hard as a bullet and heavy as lead."** The best late, round cabbage.

The Grandest, Best Keeping, Surest Heading, Large Cabbage in the World

For almost half a century this grand cabbage has held absolute sway as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

Always In Great Demand

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far **superior in every respect to any other late sort** that he has ever tried, that where Salzer's Giant Flat Dutch has once gotten a foot-hold in a garden, it has never been supplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, **far superior for sauerkraut** and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

A Sure Header

For sureness in heading and regularity in growth, **SALZER'S GIANT FLAT DUTCH** certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which turn in the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping. There are many magnificent strains of Cabbage Seed offered in this catalogue, but we think we can safely say that **SALZER'S GIANT FLAT DUTCH is equaled and surpassed by none.**

250—Price of Salzer's Giant Flat Dutch Cabbage: Pkg., 15c; ½ oz., 25c; oz., 45c; ¼ lb., $1.35; ½ lb., $2.50; per lb., $4.90, postpaid. **See Page 18 for disease-resistant seed of this variety.**

Gives Big Results Everywhere

Mr. F. Bailey, % E. Nichols, R. D. 2, Eaton Rapids, Mich., writes,
"I grew Giant Flat Dutch Cabbages weighing 25 pounds. When we were gathering cabbages, my boy said, 'Here go the Brownies over your cabbage!' and he ran along the tops for 2 or 3 rods, and 12 years old at that. Will grow heavier ones this year."

Marion M. Norris, R. D. 2, Pendleton, Ind., writes,
"Last year we sold $9.00 worth of cabbage, made 10 gallons kraut, and buried 25 heads, from 2 Pkts. of your Giant Flat Dutch. Your seeds surely grow."

Mr. R. E. Pickering, Sholes, Nebr., writes,
"Last year we took prizes at the County Fair on your Giant Flat Dutch Cabbage and Early Rose Potatoes. Am well pleased with your seed."

SALZER'S EARLIEST SUREHEAD

IT HEADS WHERE OTHERS FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a **SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.**

The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads, which are pure snowy white, with very close and compact curds of wonderfully fine quality. The heads are of large size, often reaching 10 inches or more in diameter.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. **Salzer's Earliest Surehead matures in about 95 days and is a sure header.**

317—Pkg., 18c; ¼ oz., 60c; ½ oz., $1.15; oz., $2.20; 2 oz., $4.35; ¼ lb., $8.50, postpaid.

Salzer's Earliest Surehead

SALZER'S FIRST CROP

A new, distinct, and extremely early variety. A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an **ideal Cauliflower for forcing** during winter and spring. Severe tests have proved it absolutely certain to head when conditions are ordinarily favorable, and also **most uniform in growth, type and maturity,** the crops being taken off almost clean at the first cutting. One characteristic of this novelty is the close sitting together of the leaves, enfolding the head tightly and causing the inner leaves almost to cover the flower, thereby avoiding the necessity of early tying up.

The heads are very beautiful, solid, snow white, of medium size, which will find a ready sale at the highest prices everywhere and will never fail to be appreciated.

321—Pkg., 14c; ¼ oz., 58c; ½ oz., $1.04; oz., $1.95; 2 oz., $3.84; ¼ lb., $7.50, postpaid.

Salzer's First Crop

The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, **for dry, hot climates it is to be preferred to all other sorts,** being a sure header there when other sorts fail. Even in the driest weather, it is of a vigorous growth.

316—Pkg., 15c; ¼ oz., 51c; ½ oz., 98c; oz., $1.85; 2 oz., $3.60; ¼ lb., $6.95, postpaid.

Salzer's Earliest Coreless Carrot

The Earliest, Sweetest, Most Tender and Only Really Coreless Carrot Grown

Salzer's Earliest Coreless, Finest Carrot in Cultivation

The peer of all carrots—the grandest carrot in cultivation! Market gardeners, if you want highest, top-notch prices, you must plant Salzer's Earliest Coreless Carrot. Home Gardeners, if you want to have carrots that will be a real treat for your own table use, carrots that you will take pride in showing to your neighbor, you must plant Salzer's Earliest Coreless. **A carrot that is in a class all by itself, and has been ever since it was introduced by us over twenty-five years ago.** Some seedsmen may list this or offer you "just as good" stock, but insist upon Salzer's true, genuine, pure-bred seed. Seed that has been carefully tested for germination and trueness to type at Cliffwood Farms.

As in all else, Salzer's Earliest Coreless Carrot reigns supreme in the carrot world. Those who once plant it never discard this incomparable strain. Those who have never planted it, are missing a real treat. **Our Earliest Coreless will demonstrate what splendid flavor, what tenderness, what attractive color, what lusciousness, what symmetry, can be bred into carrots.** The painstaking trial and development of this superb strain is necessarily expensive, but it will pay everyone to allow a few cents more in order to include Salzer's Earliest Coreless in their seed order. When planting seeds, the best is none too good. It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a distinct variety. It is exceptionally uniform in shape, of fine texture **and entirely free of any heart and is very early, maturing about 2 weeks ahead of all other half long sorts,** although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is **a beautiful red, brighter and deeper than that of any other Carrot.** It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this new variety is the entire absence of the stringy, coarse heart or core found in all other Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

It averages 6 to 7 inches in length, is broad at the neck and narrows gradually to a round, blunt base. The flesh is a rich, orange-red, fine grained, tender, juicy, and remarkably free from core. An excellent early crop or main crop carrot and splendid for the home garden. Although grown principally for bunching, it is also widely used for a bushel carrot. **292—Pkg., 5c; oz., 9c; ¼ lb., 26c; ½ lb., 47c; lb., 90c, postpaid.**

Salzer's Danver's Half Long Carrot

Your Earliest Coreless Carrots are the only ones I have ever grown that have no core.—Mr. Konrad Sorenson, South Range, Wisc.

SALZER'S RED CORED CHANTENAY CARROT

The beautiful, rich, orange-red core is the one outstanding feature of this superb Chantenay carrot! A stringy yellow core has always been objectionable and in Salzer's Red Cored Chantenay, not only has the core been materially refined, sweetened and reduced, but the color has been bred to practically the same shade as the carrot itself.

Sliced or diced, Salzer's Red Cored Chantenay makes a beautiful dish. The roots measure about six inches in length, they are very thick, free from large eyes and side rootlets, medium early, and run very uniform in shape, with medium sized tops, making them ideal for bunching. **The flesh is tender, sweet and juicy, but the greatest feature is the tender, delicate, handsome rich red core, with no trace of yellow, and of almost the same shade as the attractive, tender orange-red flesh itself.** Medium early in maturity, yields heavily. These carrots always command highest prices.

Improved Long Orange (See Page 20)

SALZER'S SELECT OXHEART

Also known as Guerande. The best and most popular of the short, thick-formed carrots. It is a heavy yielder and because of its shape it is highly desirable for heavy soils. The roots are about 5 inches long, 3½ to 4 inches wide at the shoulder and taper down to a 2-inch stump-rooted bottom. Of the finest quality for table use, very free from any hard core, and both skin and flesh are rich orange colored. An excellent sort for the private garden as well as the trucker, being especially valuable for spring and early summer crop. **Of great value on shallow soils, where the longer varieties will not succeed.**

302—Pkg., 5c; oz., 9c; ¼ lb., 27c; ½ lb., 50c; lb., 95c, postpaid.

PRIDE OF DENMARK

A cross between the two well-known varieties, Nantes and Chantenay, this introduction unites the good qualities of both. **Salzer's Pride of Denmark is an admirable carrot for storing and shipping, holding to a remarkable degree its fine flavor, tenderness and crispness.** The long obtuse, cylindrical roots are absolutely smooth, of a beautiful scarlet color and best of all are practically coreless. As the carrots reach a good size (6 to 8 inches) your soil should be thoroughly prepared.

We introduced this in 1926 under the name of Feonia, which name has now been discontinued. Order early as this carrot has already won marks of distinction, and the seed is going to be much in demand this season. In the few years we have been listing it, it has been widely used and all who tried it are well pleased with it.

304—Pkg., 10c; oz., 13c; 2 oz., 19c; ¼ lb., 35c; ½ lb., 67c; lb., $1.25, postpaid.

JAPANESE CARROTS

TAKINOGAWA—A great novelty! A leading, standard variety of Japanese carrot which excels all of their other sorts in sweetness and productiveness. **It is an especially long carrot, rather thick, and runs uniform in size.** The skin is smooth and handsome, and the flesh is entirely red, with practically no core. It is widely grown in Japan, and prized very highly there. Has a delicious flavor.

305—Pkg., 10c; oz., 18c; ¼ lb., 55c, postpaid.

FIELD CARROTS SALZER'S MASTODON

Field carrots are of high nutritive value and seem also to be a sort of tonic, keeping the stock in good condition. Horses are especially fond of them and in a good many stables, horses are fed carrots once a day. The wise dairyman knows the value of carrots for cows, as they will not only increase the flow of milk but will also improve the quality, and will give a rich, golden color to the butter. Sow seed thinly in drills 3 feet apart, using four pounds to the acre. To get the heaviest crops, fertilize well.

Salzer's Mastodon Field Carrot is the most productive variety and it is easily harvested. It is of creamy white color with a green crown. The roots are smooth, 8 to 10 inches in length, about 3 inches broad at the shoulder, and taper gradually to the bottom. The flesh is crisp, solid, sweet, white and very nutritious. A splendid keeper, and a prodigious cropper, yielding in suitable ground from 20 to 30 tons per acre.

As to quality, Mr. D. D. Birks, Metaline, Wash., writes, **"We are sending you 3 carrots which were grown from your Mastodon seed. We tried cooking them early in the season and have never quit. I have given them to several friends and all agree with me that they are the best carrots they ever ate."** If Salzer's Mastodon is so palatable for the table, is it any wonder that stock relish it?

1468—Pkg., 10c; oz., 12c; ¼ lb., 23c; ½ lb., 43c; lb., 80c; 2 lbs., $1.50; 5 lbs., $3.45; 10 lbs., $6.35, postpaid.

I ordered your Earliest Coreless Carrots last year, and they were the best I ever saw.—Mr. J. C. Welborn, R. D. 5, McKinney, Texas.

Italian Green Sprouting Broccoli

BROCCOLI

Also known as Winter Cauliflower, Broccoli is of special value for the northern sections where Cauliflower cannot be grown. In flavor, growth, habit and culture similar to Cauliflower, but much more hardy. Sow the seed early in May and transplant in June.

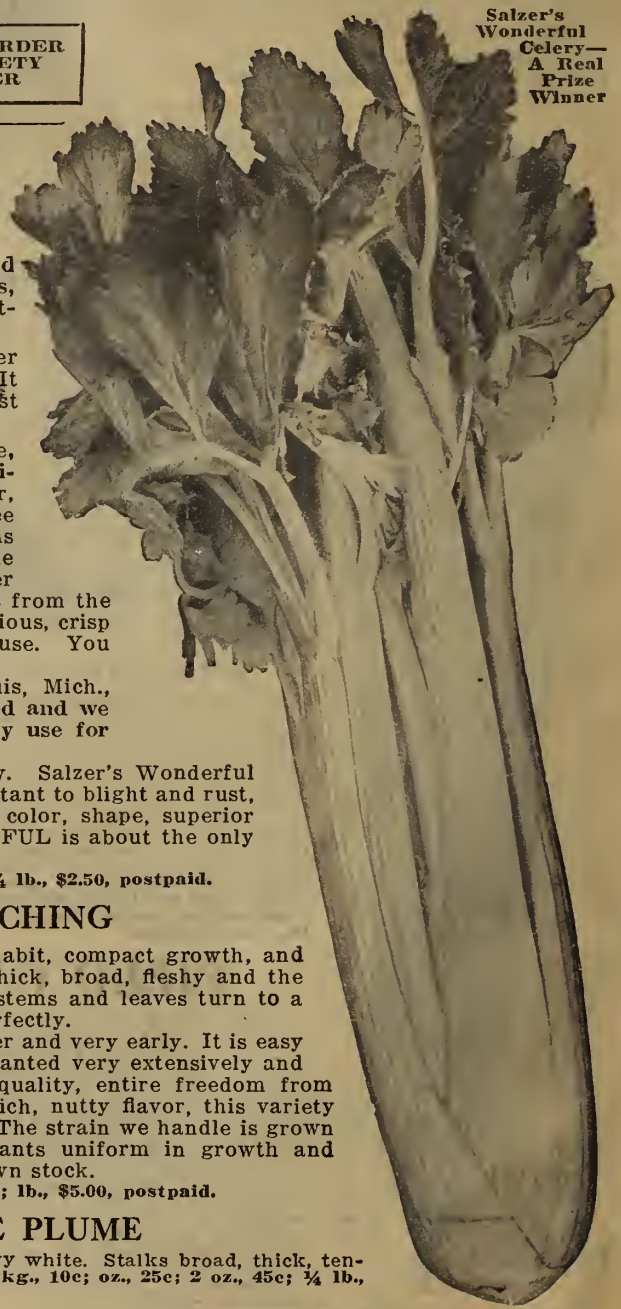

ITALIAN GREEN SPROUTING—A distinct variety, extensively cultivated by Italian gardeners. It is remarkably early and of great value for short season sections. Plant forms a large, solid head which remains green. When the central head is cut, numerous sprouts develop from the leaf axes, each sprout terminating in small green heads which are bunched for market. Elegant cauliflower flavor, tender and delicious. 70 days. **203—Pkg., 12c; ¼ oz., 16c; ½ oz., 28c; oz., 49c; 2 oz., 91c; ¼ lb., $1.75, postpaid.**

EARLY VALENTINE—Grows, tastes, and looks like cauliflower. Easily grown and ideal for short season sections. Large heads, compact curds of best quality. Very early and yields heavily. 85 days. **202—Pkg., 10c; ¼ oz., 14c; ½ oz., 24c; oz., 41c; 2 oz., 78c; ¼ lb., $1.50.**

LARGE WHITE—Later, but larger. Heads are very large, firm, pure white, and of fine quality, and remain in good condition longer than Cauliflower. 100 days. **200—Pkg., 9c; ¼ oz., 11c; ½ oz., 19c; oz., 35c; 2 oz., 67c; ¼ lb., $1.25, postpaid.**

Salzer's Wonderful Celery—A Real Prize Winner

Northern Celery *Grown*

SALZER'S WONDERFUL

Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight,—these are the outstanding characteristics of this superb celery.

We introduced this fine strain several years ago and ever since we have hardly been able to supply the demand. It certainly is a grand celery and if you missed out on it last year, be sure to try it this spring.

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery, being fit for use the latter part of August, and remaining in use until the later winter sorts mature. This extra-earliness spells top prices from the early fall trade, for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's own table use. You will be proud of this celery when you serve it at dinner.

Mrs. Elizabeth Schaus, 17 W. Prospect Ave., St. Louis, Mich., writes, "We planted some of your Wonderful Celery Seed and we want some more. Have raised our own celery for family use for years, but never had as good celery as your Wonderful."

Note in the illustration how compactly the stalks grow. Salzer's Wonderful grows uniformly like this. The plants are remarkably resistant to blight and rust, a factor of great importance. Earliness, size, attractive color, shape, superior flavor, resistance to blight and rust!—the name WONDERFUL is about the only fitting one for this celery.

345—Pkg., 12c; ¼ oz., 20c; ½ oz., 36c; oz., 67c; 2 oz., $1.29; ¼ lb., $2.50, postpaid.

SALZER'S GOLDEN SELF-BLANCHING

The beautiful appearance of the plant, with its close habit, compact growth, and straight, vigorous stalks is indescribable. The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

Salzer's Golden Self-Blanching is a vigorous dwarf grower and very early. It is easy to cultivate and in every way a desirable variety. It is planted very extensively and owing to its handsome, waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich, nutty flavor, this variety is most popular and the leading celery in many markets. The strain we handle is grown in France, it is the finest in the market and produces plants uniform in growth and color, with heavy, solid stalks. We offer only French grown stock.

333—Pkg., 10c; oz., 37c; 2 oz., 68c; ¼ lb., $1.32; ½ lb., $2.59; lb., $5.00, postpaid.

SALZER'S SELECT WHITE PLUME

A fine, popular celery, very early. Blanches to a pure snowy white. Stalks broad, thick, tender, crisp, fine rich nutty flavor and excellent quality. **335—Pkg., 10c; oz., 25c; 2 oz., 45c; ¼ lb., 80c; ½ lb., $1.55; lb., $3.00, postpaid.**

Your Mastodon Carrots cannot be beat. From ¼ pound seed I got thirty bushel big carrots.—Mr. L. J. Riegle, Lookout, Okla.

SALZER'S SELF-BLANCHER CELERY

Thick Heavy Stalks, Beautiful, Silvery White Color

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the old variety.

Next to Salzer's Wonderful it is the earliest celery that can be grown. We introduced Salzer's Self-Blancher a number of years ago and have kept on improving it year after year, and we believe that now it is more largely grown than any other self-blanching variety. It has certainly become renowned for earliness, beauty, quality and flavor. Is of dwarf and compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so exeeptionally well, it is widely grown for fall and winter use.

Many people who have never been able to grow celery before can grow this one to perfection, and succeed with it as well as with other vegetables. Salzer's Self-Blancher is singularly free from the habit most other blanching varieties have of reverting back to the original green celery. To obtain best results, celery should have rich, well-manured soil and plenty of water. For the earliest crops, seed should be sown in boxes in February or March, and for the Fall or main crop, it may be sown in the open ground as early as the ground can be worked into good condition. **334—Pkg., 15c; oz., 40c; 2 oz., 73c; ¼ lb., $1.35; ½ lb., $2.55; lb., $4.95, postpaid.**

Salzer's Self-Blancher Handsome—Tender

GIANT PASCAL WINTER CELERY

Stalks are very large, thick, solid, unusually tender and crisp, snapping like glass. This is the finest of all winter celeries for the home garden but it is too brittle to stand much shipping. It blanches readily to a rich golden yellow. Is a splendid keeper. **342—Pkg., 10c; oz., 25c; 2 oz., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

SALZER'S WINTER QUEEN CELERY

The standard variety for winter keeping. It is the finest dwarf winter celery that we have ever grown on Cliffwood Farms. The plants are large, of close habit and compact growth, stalks are very large, broad, solid, crisp, tender and of a delicious flavor. Blanches easily to a beautiful creamy white. The stalks are all of even length and present a handsome appearance when bunched. It is a splendid keeper and stands shipping well. **343—Pkg., 10c; oz., 25c; 2 oz., 40c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

TURNIP ROOTED CELERY OR CELERIAC

Differs from other celery in that the roots are cultivated for use instead of the tops. Used for soups, stews and salads, or boiled like Parsnips or Turnips. It has a rich, meaty, distinct celery flavor and it deserves much wider cultivation, as it has real merit. Keeps well. Seed should be sown and given the same treatment as celery, but the plants do not require earthing up.

LARGE EARLY ERFURT—This turnip rooted celery is ready for use in June, if planted early. Considered the earliest of this variety of celery. The flesh is pure white, very tender, not woody, and of finest quality. **351—Pkg., 10c; oz., 20c; 2 oz., 36c; ¼ lb., 67c; lb., $2.50, postpaid.**

GIANT PRAGUE—Excels in quality, size and appearance. It is the main crop variety, nearly globe shaped, reaches a large size, and has few rootlets at the bottom. Splendid keeper. Flesh richly flavored, tender and greatly prized either cooked or as a salad. **352—Pkg., 10c; oz., 19c; 2 oz., 34c; ¼ lb., 63c; lb., $2.35, postpaid.**

Salzer's Winter Queen Celery

EGG PLANT

Egg Plant seed germinates slowly and should be started under glass, with moderately high temperature, about March 1st.

SALZER'S NEW YORK PURPLE—Extra large fruits, weighing several pounds each, with a circumference of twelve to fifteen inches, have often been grown of this strain, and as much as thirty pounds of fruit from one plant. The fruits are of deep purple color, quite smooth, and have white delicious flesh. Ready for table in about 95 days. **494—Pkg., 10c; oz., 33c; 2 oz., 63c; ¼ lb., $1.19; ½ lb., $2.32; lb., $4.50, ppd.**

SALZER'S BLACK BEAUTY—A most desirable variety for the home garden and truckers, especially in the North, as it matures ten to twelve days ahead of the New York Purple. The fruits are broad, thick, symmetrical in shape, of a rich, lustrous purplish black color, and of splendid flavor. **492—Pkg., 10c; oz., 36c; 2 oz., 67c; ¼ lb., $1.29; ½ lb., $2.55; lb., $4.95, postpaid.**

CHINESE WONDER—A great novelty. Imagine an Eggplant 25 inches long! **Fruits are somewhat oblong in shape, of a beautiful purplish-black color, and reach a length of 15 to 30 inches.** The skin is very thin and the flesh is very tender, with very few seeds. **495—Pkg., 15c; ½ oz., 45c; oz., 80c, postpaid.**

Salzer's Independence or 4th of July Corn

The Largest Eared, Heaviest Yielding, Extra Early Sweet Corn

Our sales of this Sweet Corn have been enormous and are increasing from year to year. Our supply, although always larger than that of the preceding year, generally has been exhausted before the end of the season. We do not hesitate to say now that more of Salzer's Independence Corn has been planted all over the country in the last few years than of any other extra early sort.

Comparative tests made in our trial ground prove Salzer's Independence far superior In size, productiveness and delicious quality to any other first early variety: the many testimonials we have received, a few of which are printed here, show the satisfaction this corn has given wherever used.

The stalks grow about 5 feet high and produce generally from 2 to 3 fine long ears, twelve rowed, and about 10 inches long, which are very symmetrical and handsome. The grains, which are tightly set, are large, deeper than broad, very white, and are of an exquisite fine quality, usually found only in the later sorts. Quite often reports have reached us of ears of our Independence Corn having been in edible condition in 45 to 50 days from planting the seed, and if sown in the fore part of May in our section in a favorable season, luscious ears of this variety should surely be ready for the table by **July the 4th.**

Salzer's Independence or Fourth of July Corn, an introduction of ours of over a quarter of a century ago, yields first place to none for extreme extra-earliness, and is the earliest white sweet corn grown. It is the LARGEST EARED and HEAVIEST YIELDING EXTRA EARLY SWEET CORN, bar none. A great seller at market. **Sixty days from planting** one should pluck mature sweet corn, so that at your Independence Day dinner you can serve sweet, luscious, tender, finest quality corn on the cob—**ears 10 inches and more in length,** each having twelve rows, symmetrical, handsome, and with nicely rounded, rather blunt, tips.

It is grown successfully everywhere. Mr. W. A. Zimmerman, 530 Gartland Avenue, Sandusky, Ohio, writes, **"Your 4th of July Sweet Corn is the best I ever heard of and I want some more of it this year."** Mrs. Herman Allgner, Brainerd, Minn., writes, **"Your Independence Sweet Corn and your tomatoes sure can't be beat."** Mrs. J. W. Rector, Rangely, Colo., writes, **"From a small corn patch in my garden I picked 1,250 ears of your Fourth of July Sweet Corn."** Mr. John Van Vorst, 712 So. 1st Ave., Fargo, N. D., writes, **"My garden is 50 x 100 feet and from the corn patch I gathered 75 dozen ears of your Independence Sweet Corn. Your seeds were all first class."**

Let's sum up the whole matter on Salzer's Independence Corn. Every market gardener, every citizen, everybody planting same, finds that he has about the largest Earliest Sweet Corn grown, and that it is from five to twenty days earlier than other sorts. Then he finds it is sweeter than the sweetest Sweet Corn known to the trade today. Customers praise it as the very sweetest, earliest, finest White Sweet Corn offered. If you have never planted it, don't pass it by this year,—be sure to give it a trial.

Salzer's Golden Gem Sweet Corn

Truly, present day accomplishments are little short of marvels! After having produced Golden Sunshine Corn, a remarkable early yellow sweet corn, **Prof. A. F. Yeager, Horticulturist at the North Dakota Agricultural College Experiment Station, has bred Golden Gem Sweet Corn, which is even 5 to 7 days earlier than that famous variety. We have secured our stock seed from Prof. Yeager.**

The ears are of good size, averaging 7 to 8 inches in length, and are borne close to the ground on stalks about 3½ feet high. **From one to three ears are produced on each stalk. Golden Gem is eight rowed; kernels are quite deep, broad, meaty, rich golden yellow, very tender and of the sweetest and most sugary flavor imaginable. The greatest feature, however, is its extreme earliness!** At Cornell University, Ithaca, N. Y., the trials of Golden Gem Sweet Corn were earlier and bore slightly larger ears than Extra Early Bantam or Golden Sunshine Sweet Corns. With Golden Gem, market gardeners may secure even better prices and home gardeners may have absolutely the very earliest yellow sweet corn!

SAL-ZER'S

An Ear of Salzer's Delicious Honey Boy

Honey Boy—

Unusually early, unusually sweet, high in sugar content, handsome, attractive, tender and juicy, Salzer's Honey Boy is popular with the market gardener, as maturing in 55 days in this northern climate, it enables him to get the first edible sweet corn to market and to reap the consequent high prices. Popular with the home gardener as it enables him to grow delicious, melting quality sweet corn for his table in an astonishingly short time.

Developed for a short season, **it is the best extra early sweet corn for any district and especially for the entire Northwest.** Like all extra-early varieties, the stalks are slender and grow 4 to 5 feet high, and the ears are about sixteen inches above the ground. Being a free stooler, it shoots up many stalks, hence is a heavy yielder. is a new type of Golden Bantam Sweet Corn, having the same fine characteristics as its progenitor but with this advantage—it is about ten days to two weeks earlier. It was developed by Prof. A. F. We urge you to order early.

Country Gentleman Sweet Corn

A Superb Late Sweet Corn

Prodigious Cropper—Tender and Sweet

Salzer's Country Gentleman

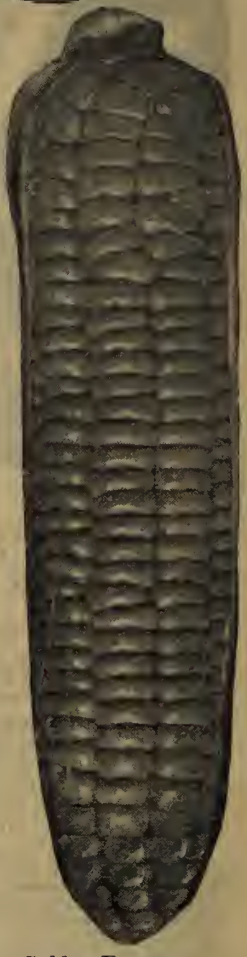

Salzer's Country Gentleman is one of the best late sweet corns. Has a small white cob, closely packed with perfectly round kernels, irregularly arranged, slender and very deep, resembling "shoe-pegs." Because of this long, deep kernel, **it is admirably adapted for canning.** Stalks grow 6 to 7 feet high, bearing 2 to 3 ears each.

Ears are 8 to 9 inches long with a narrow, core-like cob, and are of a delicious sweetness, tender, juicy, and remain "in the milk" longer than other varieties as they are encased in a heavy husk. Matures in about 90 days. **392—Pkg., 10c; lb., 37c; 2 lbs., 65c; 5 lbs., $1.34, postpaid. Not prepaid, 10 lbs., $2.15; 25 lbs., $4.95; 50 lbs., $9.15.**

SALZER'S GOLDEN EVERGREEN

The late, main crop, yellow sweet corn. Salzer's Golden Evergreen is a cross between Stowell's Evergreen and Golden Bantam, and combines the size of ear of the former with the rich golden yellow and delicious buttery quality of the latter. The plants grow vigorously to a height of 6 to 7 feet, they are strong, profuscly leaved, and each stalk bears two fine ears, twelve-rowed, seven to eight inches long, and packed with delicious golden grains in straight rows, of the finest and sweetest flavor. For the home garden it will be a real treat, and for the market it will bring fancy prices. It furnishes larger ears than the Golden Bantam, and as it is later, it prolongs the season considerably.

SALZER'S PROLIFIC PICKLE CUCUMBER

Plant Salzer's Prolific and Pick Basketsful of the Finest and Best Cucumbers for Pickling

SALZER'S EARLIEST LETTUCE

EARLIEST CURLED OR LOOSE LEAVED LETTUCE. DELICIOUSLY CRISP AND TENDER, EASIEST TO GROW

Yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to if not better than, the tender heart leaves of many heading varieties. Salzer's Earliest is the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. It is the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up.

540—Pkg., 15c; oz., 20c; ¼ lb., 59c; ½ lb., $1.05; lb., $1.95, postpaid.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and **does not make a head.** Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. It is one of the best home garden varieties as it grows quickly and makes a lot of good eating leaves which are of remarkably good flavor. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. Because of this unusual tenderness, it does not stand shipping well to distant markets. This superb strain was introduced in about 1875.

575—Pkg., 9c; oz., 13c; ¼ lb., 37c; ½ lb., 68c; lb., $1.30, postpaid.

BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

554—Pkg., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25, postpaid.

Cliffwood Summer Header

Best Hot Weather Variety

CLIFFWOOD SUMMER HEADER LETTUCE

A superb new lettuce that we introduced in 1927. For years we had been working to develop a lettuce that would form solid heads despite hot weather, a thing which has hitherto been almost impossible. We finally developed this grand new strain which heads during the heat of summer! In severe tests on our great Cliffwood Farms, practically every plant formed a fine, firm, solid head of butterhead lettuce of the finest flavor, despite very hot weather.

The leaves are light green, crumpled, thick and tender, blanching to creamy white in the center of the head. Heads are large, about 8 to 10 inches in diameter, they have a delicious rich, buttery flavor, and they are the last to go to seed. It stands heat better than any other variety, without wilting. Be sure to give it a trial this year. **577—Price of Summer Header Lettuce: Pkg., 14c; oz., 20c; ¼ lb., 70c; ½ lb., $1.30; lb., $2.50, postpaid.**

SALZER'S CRISP AS ICE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a cabbage butter head lettuce, the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. A cool weather variety, valuable for both early spring and fall.

This head lettuce, when cut open has such a rich, creamy heart, and is so tender and brittle, that when it was introduced in about 1894, it was immediately and rightly named Crisp As Ice. It enjoys a wide popularity and is extensively grown. We recommend Salzer's Crisp As Ice unreservedly for the home gardener. Mr. H. J. Welker, Myerstown, Pa., writes, **"Your Crisp As Ice Lettuce has proven all you say about it. We never tasted such crisp and fine lettuce."**

556—Pkg., 12c; oz., 20c; ¼ lb., 56c; ½ lb., $1.05; lb., $1.95, postpaid.

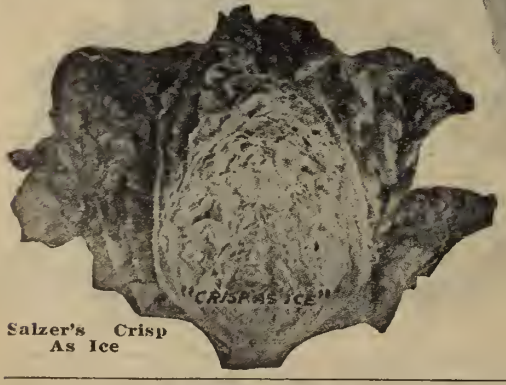

CALIF. CREAM BUTTER

Salzer's California Cream Butter is a cabbage, butter head type, with thick leaves, large in size, of a beautiful and attractive rich dark green, tinged and spotted with brown. Ideal for the home garden. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. **It is of first class quality, it is a good shipper, and it forms a fine solid head under any ordinary conditions.**

Salzer's California Cream Butter Lettuce

Salzer's Crisp As Ice

Your Summer Header Lettuce was the best lettuce I ever had and did not wilt, even in the terrific heat of last year.—Mrs. Sherman Hartlep, Box 625, Maynard, Minn.

NEW YORK OR WONDERFUL LETTUCE

A curled or crisp heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. Because of its immense size, fine color, crisp tenderness, and delicate flavor, it is always in demand in hotels throughout the country. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each.

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety.

565—Pkg., 10c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00, postpaid.

Salzer's New York or Wonderful

SALZER'S ICEBERG

A most satisfactory crisp heading variety with curly leaves of light green tinged with brown on the edges. **It forms a hard head of crisp tender quality, and blanches to a creamy whiteness.** One of the best for the home garden and home market. **563—Pkg., 10c; oz., 14c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50, postpaid.**

SALZER'S MAY KING

Salzer's May King is a cabbage, butter head type, medium small, light green, tinged slightly at edges with brown. Very early. The heart is well folded, solid, and blanches to a beautiful light golden yellow. It is tender, brittle, juicy, and of a fine buttery flavor. Very hardy, and a sure header.

560—Pkg., 10c; oz., 14c; ¼ lb., 38c; ½ lb., 72c; lb., $1.35, postpaid.

SALZER'S BIG BOSTON

A cabbage head, butter type, medium large, about 11 inches across, finely shaped, globular, medium light green with a slight tinge of brown on margins of outer leaves. It is early and hardy, and stands shipping well. The leaf is smooth and is practically not blistered or crumpled, with a tendency to a bright sheen. Heads are tender, brittle, juicy, fine buttery flavor, and the interior is an attractive light golden yellow. **553—Pkg., 5c; oz., 11c; ¼ lb., 35c; ½ lb., 67c; lb., $1.25, postpaid.**

581—Big Boston, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special re-selected strain certified by THREE-WAY tests. **Pkg., 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75, postpaid.**

Creamy Heart Lettuce

A new, black-seeded, cabbage head lettuce of the butter type, medium green color and of medium size. The head is firm and solid and the heart is a very rich cream color. **It has a very firm, tender, buttery flavor, matures early, is slow to go to seed, and stands the heat of summer well.**

It is much superior in every way to many of the other butter types of lettuce, both in quality, earliness and ability to form sound, solid heads. Is a sure header. **579—Pkg., 9c; oz., 15c; 2 oz., 28c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75, postpaid.**

Salzer's Creamy Heart Lettuce

SALZER'S IMPROVED HANSON

Exceptionally early, large globular, crisp heads which are firm and well blanched. The leaves are broad, crumpled and twisted, of light green color, never spotted or brownish. It is of very sweet flavor, and succeeds everywhere and at all times. Heads well during hot weather. Miss Agnes Sandford, 431 No. First Ave., Canton, Ill., writes, **"I have never had such fine head lettuce as last year, when I planted your Improved Hanson Lettuce. Friends all remarked about it."**

562—Pkg., 10c; oz., 14c; ¼ lb., 35c; ½ lb., 67c; lb., $1.25, postpaid.

PARIS WHITE COS LETTUCE

The Cos Lettuces are distinguished from other lettuces in that their leaves are elongated and almost always somewhat spoon-shaped. They are grown in exactly the same way as other lettuce. When young, the leaves are pale green. When full grown, they form a loose, conical head, outer leaves light green and rather crimped, inner leaves very pale green with the midrib white and very prominent. Very crisp and has a delicious flavor.

Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size; plants weighing six pounds have been grown of this variety.

598—Pkg., 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.50, postpaid.

CHINESE OR CHICKEN LETTUCE

You have doubtless often read that lettuce is an excellent feed for chickens. In this new variety you will find a feed that yields more than other green feeds, and that is much preferred by poultry. **When Salzer's Chicken Lettuce is cut, it grows rapidly again, and may be cut again and again. The yield is extremely heavy; grows 3 to 4 feet high and does not form a head.** For table use, it perhaps will be found too coarse. If you have any chickens, by all means sow some this year. It will be the best investment you can make.

578—Pkg., 10c; oz., 14c; ¼ lb., 35c; lb., $1.25; 5 lbs., $5.25, postpaid.

I am always well pleased with your seeds. Planted your May King Lettuce last year and had nice big heads.—Mrs. Joel Boller, Box 203, Gridley, Ill.

Mangels and Sugar Beets

SALZER'S EIFFEL TOWER MANGEL

Both Mangels and Sugar Beets require deep, well enriched soil. Sow in May or June in rows 1½ to 2 feet apart and 8 inches apart in the row. Sugar Beets and Mangels improve the health and condition of animals, increase the flow and quality of milk, cut down your fodder bills, and give your stock a varied diet. If you keep only one cow, you should grow a small patch for winter feed. They make excellent and rich feed for poultry. Sow 5 pounds per acre in drills, 15 to 20 pounds per acre broadcast. For winter, store in cellar or pits.

Salzer's Eiffel Tower Mangel yields enormously. It is the heaviest cropping and largest of all mangels. The roots grow uniformly from ½ to ⅔ above the surface and are often 2 feet and more in length and 6 inches in diameter. The skin is bright red and the flesh is white tinged with rose. Of fine quality and exceptionally high feeding value. A wonderful yielder, and we recommend it strongly. Your stock will thrive on this splendid and most popular variety.

The Eiffel Tower Mangel again and again fairly covers itself with glory, and calls forth unanimous praise from thousands of farmers. Eiffel Tower stands away ahead of every Mangel yet tried. It is mammoth in size, a specimen having been grown under irrigation in Arizona WEIGHING 104 POUNDS.

The Mangel is enormously, wonderfully prolific. Its yield is fabulous, 1,000 to 1,800 bushels is nothing uncommon on good soil. It is easily harvested, growing well above the ground. Its quality is of a high order, and is greatly relished by all cattle, giving a wonderful flow of milk, and is an excellent food for fattening.

1489—Pkg., 10c; oz., 15c; ¼ lb., 30c; ½ lb., 55c; lb., $1.00; 5 lbs., $4.25; 10 lbs., $7.95, postpaid.

DANISH SLUDSTRUP

A superb new Mangel from Denmark. After careful trials, the Danish government states that they found it to yield more heavily and to produce more food value per acre than any other variety. Sludstrup grows to a large size, it is thicker than Mammoth Long Red but not quite as long, and it can be easily harvested as it grows about ⅔ above ground. The roots are of a deep yellow color, smooth and handsome, and have small tops and very few side roots. Stock eat it greedily. Danish Sludstrup is very rich in nutritive content.

1498—Pkg., 5c; oz., 12c; ¼ lb., 18c; ½ lb., 32c; lb., 60c; 5 lbs., $2.75; 10 lbs., $4.95, postpaid.

MAMMOTH LONG RED MANGEL

A very prolific strain and an abundant yielder. Frequently reach a length of about two feet, grow about one-half above the surface, and the tonnage per acre on rich or well-fertilized ground is something immense. We recommend this strain next to Eiffel Tower, for size, quality and yield. Skin is deep red and flesh is veined with rose-pink. Ranks very high in nutritive value and is greatly relished by stock.

1496—Oz., 5c; ¼ lb., 16c; ½ lb., 29c; lb., 55c; 2 lbs., 98c; 5 lbs., $2.25, postpaid.

GOLDEN TANKARD MANGEL

A smooth, yellow-fleshed Mangel, high in saccharine content and in milk producing qualities. Yields immense crops and is easily harvested. Roots are heavy and solid, of a thick and typical tankard shape, tapering quickly at the bottom which is quite broad, with only a small tap-root. The flesh is firm, rich deep yellow color, and it is an excellent keeper. Cattle never tire of it.

1495—Oz., 8c; ¼ lb., 18c; ½ lb., 32c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.45, postpaid.

COLOSSAL SUGAR BEET OR HALF SUGAR MANGEL

Highly nutritious and easily stored for winter. Containing a large amount of sugar. It is superior to Mangels for stock-feeding purposes. Twice as productive as Sugar Beets. Roots are of oval shape, green above and white below the ground, flesh white and sweet. Extensively used for stock feeding. It is a heavy cropper. Mr. Herman K. Schulze, R. D. 24, Ransomville, N. Y., writes: **"I raised from your seed a Colossal Sugar Beet weighing 21½ pounds of which I am enclosing a picture. The beet was 23 inches long."**

1481—Oz., 8c; ¼ lb., 16c; ½ lb., 29c; lb., 55c; 2 lbs., $1.00; 5 lbs., $2.25, postpaid.

KLEIN WANZLEBEN SUGAR BEET

More extensively grown than any other variety for making sugar; used almost exclusively by all sugar factories. The average yield is from 15 to 20 tons per acre with about 18 per cent sugar. Our seed is pedigreed stock, producing roots testing highest in sugar content. **1482—Pkg., 5c; oz., 12c; ¼ lb., 18c; ½ lb., 32c; lb., 60c; 2 lbs., $1.10; 5 lbs., $2.45, postpaid.**

Okra

Okra is sometimes known as Gumbo. It is easy to grow and succeeds just as well in the North as in the South. Splendid for soups and stews.

PERKINS MAMMOTH LONG POD—About three feet high; pods often eight to nine inches long when ready for use, of dark green color, produced in great quantities. Matures in 50 days.

731—Pkg., 7c; oz., 9c; 2 oz., 13c; ¼ lb., 19c; ½ lb., 34c; lb., 65c, postpaid.

WHITE VELVET—It is very distinct in appearance, and unlike other varieties, the pod is not ridged, but is perfectly smooth and round. It is superior in flavor and tenderness. The plants are comparatively dwarf and of compact branching growth; the pods are of extra large size and produced in great abundance.

732—Pkg., 5c; oz., 7c; 2 oz., 11c; ¼ lb., 18c; ½ lb., 32c; lb., 60c, postpaid.

Earliest Yellow Fleshed Melon

Salzer's Earliest Ripe Muskmelon

Muskmelons

Yellow Flesh Varieties

SALZER'S EARLIEST RIPE MUSKMELON

Earliest of All. Our attention was called to this Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, yellow fleshed, extremely delicious, and sold readily in our markets from $1.25 to $2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST YELLOW-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is of oval shape, as may be seen by the illustration, of good size, about five inches in diameter, with fairly distinct ribbing, heavily netted. The flesh is exceptionally thick, of a rich salmon-yellow color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. The vines are robust and vigorous, resisting blight to a marked degree. Salzer's Earliest Ripe is a distinct variety and should not be confused with other sorts. Mr. E. E. Goetschel, 1919 Kansas Ave., Kansas City, Mo., writes: "I sent to you for 1 lb. Earliest Ripe Muskmelon and began to sell melons early in July. Some of the stores would not believe that I raised them, but claimed I had shipped them in. They were wonderful quality and sold rapidly. Your seed gives big returns." It is an enormous cropper, bearing for a long time. We sold more than 100,000 packages of this Earliest Melon last year, and we have made just that many thousand melon growers pleased, delighted and happy. If you want to make money on Earliest Melons there is no other variety in the wide world that you can plant that will give quicker returns than SALZER'S EARLIEST RIPE MUSKMELON.

SALZER'S SUGAR ROCK

A New Type of Muskmelon That Is Creating a Sensation! Also Known as Honey Rock!

Salzer's Sugar Rock is one of the most prolific melons on the market today. It is strikingly attractive and distinct from all other sorts. Fruits are oval, of good large size, without ribbing and netted in the manner characteristic of these melons and from which they take their name. Matures in about 80 days from sowing seed, in ordinary seasons.

Four characteristics describe this melon perfectly: **productiveness, striking appearance,** which always commands attention at market, **quality,** which backs up the appearance, and **ability to stand shipping and handling.** Market gardeners, these melons sell at fancy prices; customers want them! Home gardeners, these melons will make your garden the envy of the neighborhood! **The flesh is deep and thick, orange color, with a sugary and luscious flavor that is unequaled today.** It is so aromatic that one melon, uncut, will scent a room with its delightful, sugary, muskmelon odor.

The outside rind is light golden yellow overlaid with heavy gray netting, **and is so tough that ripe melons may be picked and then shipped a long distance and arrive in good condition.** Salzer's Sugar Rock is not a Rocky-ford type, being earlier and about one-half larger in size. **It is an entirely distinct melon!** Vines are strong and vigorous and do not show any trace of blight. If you want something individual in taste and appearance, this is the melon to plant. It yields heavily, as many as ten melons being produced on one vine.

626—Pkg., 10c; oz., 17c; 2 oz., 30c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00, postpaid.

The rich, red, fine-grained flesh ripens clear to the rind and is most luscious and refreshing. Not suited for shipping but a grand melon for home use and near-by markets. Thrives even under neglect. Salzer's Earlisweet Watermelon

SALZER'S EARLIEST WATERMELON

Especially bred and developed for those sections which have a short growing season, Salzer's Earliest is sure to be the first watermelon on the market, being fit for the table in about 60 days. On the La Crosse market, the earliest melons fetch prices of 50c to 80c each! Salzer's Earliest has been a money maker for market gardeners for years and is in no less demand by the home gardener who wants the very earliest, sweet, luscious watermelons for his own use.

Salzer's Earliest reaches a large size, weighing from 25 to 30 pounds, is rather round in shape, of an attractive light green color and striped irregularly with darker green. **It is enormously prolific, vines are vigorous and hardy and it is decidedly a short season melon and especially adapted for the North.** The sparkling, crisp, red flesh is of wonderfully fine texture, has a delicious and exceptionally sweet flavor and ripens down to the rind. Unusually uniform in size and shape, it is a splendid shipper, and is a leading market variety in all parts of the country. It is unquestionably the very best extra early watermelon grown and we strongly recommend it. Even in sections too cool to ordinarily grow a crop of watermelons, Salzer's Earliest will ripen and produce fine large melons.

667—Pkg., 10c; oz., 16c; ¼ lb., 43c; ½ lb., 79c; lb., $1.50; 2 lbs., $2.90; 5 lbs., $7.05, postpaid.

SALZER'S EARLISWEET

A new extra-early watermelon, the result of a cross between Mountain Sweet and Cole's Early, combining the earliness of the latter with the sugary sweetness of the former. The melons ripen 12 days earlier than Cole's Early, they are 3 to 5 pounds heavier and have a tougher rind. Fruits are oblong and mottled as shown in the illustration. Average weight is about 18 pounds, with flesh a beautiful scarlet, very fine grained and deliciously sweet. Very prolific, often producing 6 to 8 melons on a vine.

652—Pkg., 9c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; 1 lb., $1.75; 2 lbs., $3.25; 5 lbs., $7.45, postpaid.

STONE MOUNTAIN

The outstanding introduction of the past few years. Salzer's Stone Mountain is being shipped great distances in large quantities, its eating qualities being distinctly superior to any other shipping melon. Somewhat oblong in shape, few seeds, rather light gray in color, white seeded, medium rind, **and rich red, tender, very sweet, fine grained flesh.** Averages 40 lbs. and 80 lbs. on good melon soil; very prolific.

653—Pkg., 10c; oz., 15c; ¼ lb., 35c; ½ lb., 67c; lb., $1.25; 2 lbs., $2.20; 5 lbs., $4.95, postpaid.

SALZER'S WONDERMELON

Salzer's Radio or Wondermelon is large and heavy, the heaviest melon recorded weighing 77 pounds 14 ounces, almost 78 pounds! It is long and thick, measuring from 15 to 18 inches in diameter and 26 to 29 inches in length. Matured melons have a glossy dark green rind, indistinctly striped with a lighter green, which is medium thick and tough, and hence insures long keeping and shipping to distant markets. The thick, red, sweet flesh of Salzer's Radio or Wondermelon is entirely free from hard centers and shows no tendency to stringiness.

PRIDE OF MUSCATINE

The New Wilt-Resistant Watermelon

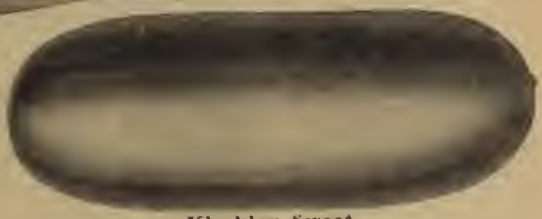

One of the outstanding developments of the past decade! In the state of Iowa alone, over 100,000 acres of productive sandy soils cannot be used for growing Watermelons because of wilt, and this new introduction is going to prove an enormous boon, not only in that state, but in every other state. Soil, once infested, can harbor the melon-wilt organisms for 15 to 20 years! The only solution is wilt-resistant seed.

The Iowa Agricultural Station, through Professors I. E. Melhus, J. J. Wilson and D. V. Layton have finally developed Pride of Muscatine Wilt-Resistant Watermelon after years of inbreeding a selection from Kleckley Sweet. It is a prolific, early maturing, long, dark green melon, of superior flavor, with thick, red, firm, crisp and sweet flesh. Light brown seeds, thick rind. It produces excellent crops on wilt sick soil, where other sorts fail completely. The melons often weigh 40 pounds each. **651**—Pkg., 15c; oz., 25c; 2 oz., 43c; ¼ lb., 81c; ½ lb., $1.55; lb., $3.00, postpaid.

SALZER'S SWEET SIBERIAN

An extra-early yellow fleshed Watermelon that matures in 50 days! This hardy, extra-early strain was introduced from Siberia and is giving excellent results in short season sections. It is grown along the Volga and is an important shipping melon, 8 and 10 steamers being loaded with them. The melons are round, dark green, borne abundantly on the vigorous, robust vines, and the flesh is beautiful golden yellow, sweet, sugary and delicious. Everyone who tastes them marvels at the sweet flavor of these melons. They grow to medium size, averaging about nine inches in diameter. Salzer's Sweet Siberian is a most valuable variety because of its extreme extra earliness; at market the melons sell rapidly at good prices. It plays an important part in the Russian diet, the seed and rind both being used for pickles. Yields heavily. **654**—Pkg., 15c; oz., 21c; ¼ lb., 67c; ½ lb., $1.29; lb., $2.50; 2 lbs., $4.15, postpaid.

SALZER'S OH, MY! MELON

The Largest Watermelon on Earth. In our latitude, by September 1st Melons of this variety have attained the enormous weight of 50 to 95 lbs.; they all grow to an enormous size. Oh, My! is an extremely prolific if not the most productive variety known. An acre will bear several thousand great Melons weighing all the way from 30 to 90 lbs., and each fit to be set before a king. The Melons are almost round in shape, of a peculiar dark brownish green color. The flesh is dark red, deliciously sweet.

We introduced this fine variety about thirty years ago and while for several years we had no seed and could not offer it, we have large and excellent quality stocks this year again. Our old customers will welcome Oh, My! and our new friends will find in it a most agreeable and deliciously sweet watermelon.

685—Pkg., 10c; oz., 16c; ¼ lb., 43c; ½ lb., 79c; lb., $1.50; 2 lbs., $2.90, postpaid.

A distinct new variety that has appeared on northern markets in volume during the past recent seasons. It is a good producer, stands wet weather well, and so far has not been subject to the diseases that have damaged other melons. This new melon is long and thick. The rind is of a rich greenish gray color, which makes it very hard to sunburn. It is wilt-resistant. It is very uniform in its growth, being the same size at each end and makes the most perfect car pack of any of the varieties. It will weigh from 25 to 75 pounds and is a perfect shipper.

IMPROVED TOM WATSON—THE PRINCE OF WATERMELONS

Without a peer! A melon in a class by itself! Salzer's Tom Watson has surprised everybody by its rapid rise in popularity. It is unsurpassed as a shipper and the big, fine quality melons sell on sight at any market. De Groot and Son of Madison, Nebraska, write, "Sold a load of 62 of your melons at market in 15 minutes." This is a record seldom, if ever, equalled.

The seeds are brown with a sprinkling of white, the rind is deep green indistinctly veined, the shape is long and cylindrical and the melons often attain a weight of 40 pounds and more. The length averages 20 to 30 inches by 10 to 12 inches in diameter, and the deep red, firm flesh extends to within three-quarters of an inch of the rind. Is rather late in maturing. One 10c Package of your Prizetaker Onion Seed gave me two heaping bushel basketsful of onions.—Mrs. Theodore Frank, R. D. 1, Athens, Wisconsin.

Among large onions, Salzer's Prizetaker always attracts attention by its fine size and great beauty. It is of the same type as the large Spanish onions that have been imported and sold at high prices. **Plant Salzer's Famous Prizetaker this year and see what splendid size, what perfect symmetry, what delicious mildness, what fine even grain, what productiveness, what all-around attractiveness has been developed and bred into this onion at Cliffwood Farms.** No need for the large Spanish onions only to sell at high prices. They cannot be distinguished from Salzer's Prizetaker, and Salzer's Prizetaker is even more superior in delicious flavor and fine appearance. It always sells at sight and at high prices—seldom for less than 5c per pound. In addition, Prizetaker comes in at a time when other onions are scarce, so the price is always high. It is a money maker for the trucker and has always given the best of satisfaction to the home gardener.

Is of clear, bright straw color, very productive, beautifully globe shaped, has a very small neck and ripens up fine and hard. Flesh is pure white, crisp, extremely sweet and mild in flavor, being unequalled even by the Spanish onions. Keeping qualities not of the best, but this is no drawback, as the onions find a ready sale always, at higher prices than other onions. Succeeds well in all sections of the country; matures rather late, in 130 to 140 days. **748—Pkg., 10c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00; 2 lbs., $3.85; 5 lbs., $8.95, postpaid.**

SALZER'S YELLOW GLOBE DANVERS

It is an excellent early variety, quick to mature, and is a remarkably good keeper. Yellow Globe Danvers is very productive, is an excellent keeper, is mild and full flavored, and has a uniform rounded shape, which is almost spherical. It is perhaps the best all around onion, and is very highly esteemed by all those who grow only one variety. Of a rich, coppery yellow, it reaches 2½ to 3 inches in size, with coats numerous and closely set.

Extensively used for general cultivation for home and market. A main crop and standard yellow onion everywhere. Produces medium to large sized bulbs of a uniform globe shape that ripen very evenly. Necks ripen down small. It is a good, reliable shipper. Attractive, rich, yellow skin. The flesh is creamy white, crisp, tender, mild and of fine flavor. For general table and cooking use this variety is unexcelled. Grows well anywhere in the United States. Matures in 120 days. **755—Pkg. 10c; oz., 15c; ¼ lb., 49c; ½ lb., 91c; lb., $1.75; 2 lbs., $3.35; 5 lbs., $8.15, postpaid.**

Salzer's Yellow Globe Danvers

SALZER'S MOUNTAIN GLOBE YELLOW DANVERS

This very early strain of Salzer's Yellow Globe Danvers Onion was bred in the mountains of Colorado. The onions are of fine globe shape, deep yellow color, very firm, and ripen two to three weeks earlier than the standard strain, and hence, are most valuable where the seasons are short. Good keeper and heavy yielder. **766—Pkg., 9c; oz., 17c; ¼ lb., 55c; ½ lb., $1.05; lb., $2.00; 2 lbs., $3.85; 5 lbs., $8.95,** postpaid.

All of the seed I bought from you last year was wonderful, especially the Prizetaker Onions. — Mrs. Arthur Eckert, R. D. 2, Box 99, Shawano, Wisc.

Salzer's Giant Silver King

Each succeeding year the popularity of this Onion increases. Gardeners, farmers and truckers grow more enthusiastic in its praise, and well they may, for this great Onion deserves every word of praise that can be spoken. Although we offered Silver King for the first time in 1884, we do not believe any other variety of vegetable excepting possibly our Giant Flat Dutch and Lightning Cabbage has since been more unanimously endorsed by one and all everywhere.

Salzer's Giant Silver King Onion is ideal for exhibition, fancy market or for the home table. **We have grown specimens at Cliffwood Farms, 22 inches in circumference instead of 21 inches as shown in the illustration, and weighing 4 pounds.** Matures early and is uniformly large and of fine shape, flattish round and thick. The silvery white skin is very thin and the fine grained, white flesh **is of such mild and deliciously sweet flavor that it can be eaten raw like an apple.** Fully grown, they measure five to seven inches in diameter; they mature evenly and keep well in storage. No other white onion attains such mammoth size, nor will any other white variety grow so uniformly large.

Mr. W. H. Mills, Star Route, Elgin, Nebr., writes, **"I purchased my Onion Seed from you and it was fine, clean seed, and not mixed. I raised a splendid crop of onions."** Mrs. J. M. Lampy, R. D. 10, Box 61, Celina, O., writes, **"I raised some of Salzer's Silver King Onions that weighed 3 lbs."** Mr. Laverne Hamilton, Box 191, 4-Mile Ranch, Musselshell, Mont., writes, **"I have never found anything that equals Salzer's Silver King Onions."** Salzer's Giant Silver King is enormously productive and every one desiring the largest and handsomest white onions of the finest flavor will be more than satisfied with this superb strain. Matures in 110 days.

742—Pkg., 10c; oz., 18c; ¼ lb., 61c; ½ lb., $1.16; lb., $2.25; 2 lbs., $4.20; 5 lbs., $9.50, postpaid.

YELLOW SWEET SPANISH ONION

Here is a grand, brand new, and entirely distinct onion that will mean a profit of from $200.00 to $300.00 more per acre than is possible with other onions. Salzer's Sweet Spanish is so mild and sweet that it is delicious when eaten like an apple.

It is one of the largest and one of the best all around onions ever produced. It is a fine, attractive, light yellow color. It is a dandy shipper. **It is of a handsome, large, globular shape, and the sparkling flesh is pure, clear white, tender, and remarkably sweet and luscious.** At Cliffwood Farms we picked up a few of these onions at random and placed them side by side on a yardstick. It took just seven to measure 36 inches, and they weighed 16⅝ pounds. **Once tasted, always grown.**

764—Pkg., 10c; ½ oz., 14c; oz., 22c; 2 oz., 39c; ¼ lb., 74c; ½ lb., $1.42; lb., $2.75; 2 lbs., $4.95, postpaid.

SALZER'S EBENEZER

One of the best mild onions for the home garden. Salzer's Ebenezer is a leading variety with gardeners everywhere because of its unusual keeping qualities, carrying through winter without loss, because of its pleasing flavor, attractive appearance, and its large uniform size. It is also equally valuable for the home gardener. Numerous testimonials received each year, bespeak the wonderful satisfaction this superb onion is giving.

WHITE PORTUGAL OR SILVERSKIN

A very popular and widely grown white onion. **It is a splendid sort for growing white onion sets, pickles, and for early bunching green onions, and we urge every gardener to make a liberal sowing of this variety for continuous use.** The large, mature onion is of mild and pleasant flavor and is of somewhat flattened shape. A great seller on the market. It is very popular for family use, it is an ideal slicer and the smaller bulbs unsurpassed for pickling purposes. Matures quickly and may be sown as late as June to produce small pickling onions by fall. Keeping qualities are not of the best, but it is splendid for early winter use. Matures in 110 days.

SALZER'S SELECTED GREAT RED WETHERSFIELD ONION

The Most Largely Grown Red Variety—The Greatest Cropping and the Standard American Red Onion

Large bulbs, flattened, but quite thick, with rich, dark, purplish skin and pure white flesh of good, mild flavor. Our stock is well bred and will invariably grow crops quite free from necky and misshapen bulbs, and onions of the largest size averaging about ½ lb. each, but specimen bulbs of one and even two pounds have often been grown from our seed. Salzer's Great Red Wethersfield produces larger crops than any other American red onion and these bulbs keep longer in good condition than those of any other sort. It gives its largest yield on rich land, but on poor and dry soils it yields better than any other sort. It is a medium early kind, maturing in about 100 days, and is adapted to varied soils and to adverse climatic conditions. Has an exceedingly fine neck and long, slender leaves of a clear green color.

This is the onion for the farmer, the citizen and the gardener to grow, to put in their cellars for the winter, because it is one of the easiest to grow, is certainly one of the best keeping Onions, always of excellent quality. It's the greatest money maker, because it is so heavy a yielder, and all Onions are so fine that they sell at good prices in all markets. John Honzik, Malin, Ore., writes, "My Red Wethersfield Onions, your seed, weighed from 1 to 2 lbs. each." **791—Pkg., 10c; oz., 14c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50; 2 lbs., $2.70; 5 lbs., $6.25, postpaid.**

GRANDPA'S CONGLOMERATION

Turn back in thought to the days of your youth, when Grandpa and Grandma planted the vegetable garden. There was always a large corner in which a mixture of different kinds of Onion seeds was planted on the theory that if one sort did not do well the other sort would, and in that way it happened always that there never was a shortage of Onions. If the good housewife wished a mild white for salads, it was always found therein; if she wished a more pungent one, that was taken and with this in view we have arranged **"Grandpa's Conglomeration Onion Mixture"**; it contains every known sort, all colors, shapes and sizes.

758—Pkg., 5c; oz., 14c; ¼ lb., 41c; ½ lb., 78c; lb., $1.50; 5 lbs., $6.15, postpaid.

SALZER'S WHITE QUEEN

Our finest pickling onion, also known as White Pearl. It is of exceptional quality and the best of all the white picklers, growing to a size of about 1 inch by ½ inch thick, with a fine neck, and is an exceedingly early strain. Onions remain hard and solid and more than one crop may be gathered for pickling in one season from successive sowings. Although used more for pickling, they are of value for early green bunch onions for early use. They have a mild, sweet flavor. It is not quite as good a keeper as the Paris Silver Skin, but it is a smaller onion and hence more used for pickling. **787—Pkg., 10c; oz., 18c; ¼ lb., 61c; ½ lb., $1.15; lb., $2.25; 2 lbs., $4.15; 5 lbs., $9.95, postpaid.**

Long White Bunching Onions

A very hardy, perennial variety used only for bunching or for early green onions; it forms no bulbs. **Long White Bunching forms thicker and whiter stems than any other variety, is earlier, and is milder in taste.** The shoots attain marketable size very quickly and sell at top prices for early market. Every home should have a patch. Seed may be sown in late summer for early spring onions. **790—Pkg., 10c; oz., 27c; ¼ lb., 93c; ½ lb., $1.80; lb., $3.50, postpaid.**

SALZER'S ONION SETS

Planting our Hardy Northern Grown Onion Sets reduces the amount of labor to a minimum, the crop is surer to grow and is ready for use several weeks in advance of that grown from seed. In fact, the ideal way is to use both sets and seeds—the sets to grow spring and summer onions, and the seed to grow onions for late fall and winter use. A pound or two is sufficient for a small family. 10 bushels plant an acre.

Salzer's Extra-Hardy Onion Plants

The use of Salzer's Onion Plants is no longer an experiment. Salzer's Onion Plants are being used more and more widely each year by commercial growers, and we strongly recommend them for the home gardener and for the market gardener. They are inexpensive, they can be set out early and in addition the plants grow well-shaped onions and onions that keep as good as those grown from sets.

You can have extremely early green onions for pulling and you can have fine, large, mature onions about 2 weeks earlier than can be had from sets and very much earlier than from seed. Also, onions from plants seldom run to seed, which is a big advantage to growers. You can set these plants out just as soon as you can get them into the ground—the same as with cabbage plants. This means that you'll get earlier crops of fully developed and larger onions—the very first onions for your own table use or the very earliest onions that bring the top prices at market. Please state on your order about what date we shall send your onion plants.

Parsnip

SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. They make splendid stock feed, and horses prefer them to carrots. A freeze is required to sweeten them. For the best results, deep soil is needed, and fresh manure should not be used as it will cause the roots to divide.

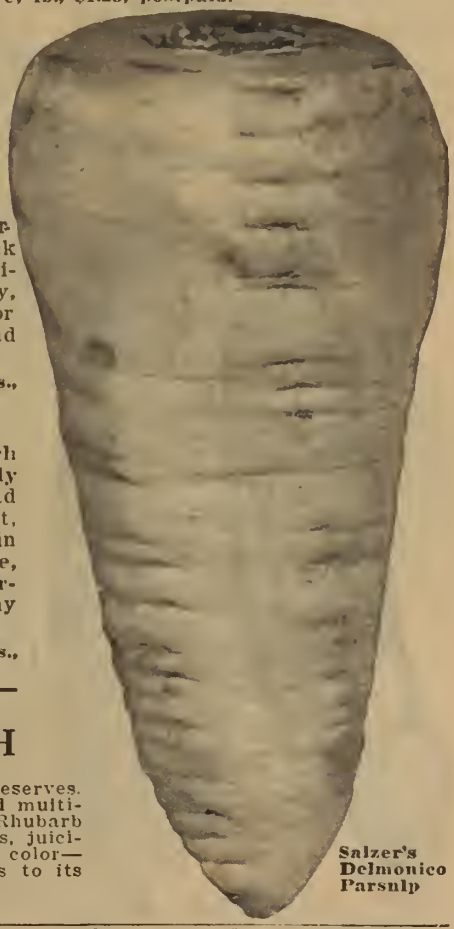

Salzer's Hollow Crown is a grand variety, one of the best. It is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but the heavy yield and high sugar content make it very desirable for stock feeding. Parsnips will improve the richness of your cows' milk and are also relished by horses. Matures in 130 days.

832—Pkg., 10c; oz., 14c; ¼ lb., 29c; ½ lb., 54c; lb., 90c; 2 lbs., $1.70; 5 lbs., $3.95, postpaid.

SALZER'S DELMONICO

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, it contains more saccharine, **is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding.** Thrives on almost any soil. This splendid variety surpasses every other in yield and quality.

833—Pkg., 10c; oz., 13c; ¼ lb., 35c; ½ lb., 65c; lb., $1.25; 2 lbs., $2.40; 5 lbs., $5.80, postpaid.

Salzer's Delmonico Parsnip

Rhubarb—SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. It is very palatable and delicious. No plant is more easily increased and multiplied than rhubarb. Every family should have some Salzer's Monarch Rhubarb in their garden. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. Rich, attractive crimson color—vastly superior to the old sorts. Stalks grow to large size without loss to its quality. Cliffwood grown seed. **See Index for Roots.**

1053—Pkg., 10c; oz., 14c; ¼ lb., 30c; ½ lb., 55c; lb., 95c, postpaid.

Giant Exhibition Peas

SALZER'S GIANT EXHIBITION PEAS

Huge Pods—Best Quality Peas

To those who wish huge podded peas, we suggest that they plant Salzer's Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. **The pods frequently grow to seven and even eight inches in length,** depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigorousness. **It has numerous first prizes to its credit,** from various fairs, which accounts for its being named Exhibition. The pods are uniform in size, of a rich dark green color, and well packed with large size peas. One of the best main crop varieties.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. To those of our customers who want immense size, and most delicious, heavy yielding peas—we recommend Salzer's Giant Exhibition.

Like turnips, they are excellent for stock feeding and as a rotation crop. Stock thrive and increase in value rapidly when turnips and rutabagas are fed in liberal quantities, and next to mangels are one of the cheapest feeds on the farm.

Salzer's Rutabaga and Turnip seeds enjoy an enormous sale on account of the sweet, juicy product of their crops. It will pay you to pay 20c to 50c a pound more for our seed than such as you buy in stores. Our seeds produce big crops of fine, sweet, juicy, rich Rutabagas.

SALZERSALAD

The Wonderful Salad Plant

Salzersalad is a distinct new salad plant that is most delicious when used in a number of ways. **The sweet and tender stalks may be cut or diced raw for salads, they may be cooked and creamed like asparagus or celery, serving them hot, the tops may be cooked and served as greens,** or the entire young plants may be cooked for greens, so necessary for the physical system. Doctors tell us that plenty of "greens" are very beneficial and necessary for good health.

Salzersalad was bred from Chinese or Celery Cabbage and has heavily crumpled deep green leaves borne on long, thick, white, closely folded stalks, tender, sweet and delicious. It is so much superior to anything heretofore offered, that we know it will give the utmost satisfaction. Salzersalad yields heavily and over a long period, being quite slow to go to seed. Home gardeners should find a place for it in their gardens, and market gardeners should give it a trial, as at La Crosse markets the plants find a ready sale.

Healthful and tasty, both raw and cooked, Salzersalad has been declared the most delicious salad plant ever produced, by all who have tried it, and we believe that every one of our customers will be very much pleased with it. For best results, sow early in spring and again about the fore part of August. **1050—Pkg., 20c; ½ oz., 34c; oz., 60c; 2 oz., $1.12; ¼ lb., $2.14; lb., $7.95, postpaid.**

Salzer's Tastygreen

TASTYGREEN—The New Vegetable!

Tastygreen is a new vegetable, rich in protein, mineral matter, and other elements so necessary to the development and maintenance of the human system. "Greens" are highly essential to our well-being, and of these, Spinach is perhaps the most widely planted and the most widely used, being served once each week at almost every table and eaten for its medicinal properties, although unpalatable to many.

Tastygreen, the new vegetable, is far superior to Spinach or any of the other greens, and has a delicious flavor all its own, slightly and agreeably pungent with a Mustard taste when served hot, and when eaten raw, the flavor somewhat resembling raw Turnips. It is very rich in body and bone-building material, the Alabama Polytechnic Institute, Auburn, Alabama, reporting a content of 22.81 per cent Protein, 25.01 per cent Mineral Matter, 2.10 per cent Lime, 0.11 per cent Iron, and 2.45 per cent water. **We believe that Tastygreen is going to become America's most popular vegetable green and that it will be canned on a large scale by canneries within a very short time.**

Tastygreen has small thin roots, about two inches long, and large oblong shaped leaves, rich dark green color, with a narrow white center rib. The leaves, stem and all, are prepared for table use in the same manner as Spinach or Turnip greens. **It is very prolific and bears abundantly. The plants grow quickly and are ready for use in 21 to 23 days after planting.** Successive sowings may be made, although the plants are very slow to go to seed; at Cliffwood Farms, plants sown in June had not gone to seed on September 5, two and one-half months later. Tastygreen withstands to a remarkable degree, extreme, dry, hot weather conditions, and will grow and produce bountifully during our spring and summer months, and in the south, during most of winter also.

Customers should give Tastygreen a trial this year, as everyone who has tried it, pronounces it delicious and very much superior to Spinach. Market gardeners will find Tastygreen a profitable crop to grow. Maturing rapidly and growing all summer long, **it permits of three or four crops a year in the North and seven or eight crops a year in the South.** The seed may be sown by hand or with a seeder; if with a seeder, set the marker about 2 notches higher than shown for Turnip seed, as Tastygreen should be planted thickly. Use 5 to 6 pounds per acre in drills (1 ounce seed to 50 feet of drill), with rows 2½ to 3 feet apart. **Gardeners have reported profits of $375.00 per acre from Tastygreen! The crop has sold readily at all markets, and as Tastygreen becomes better known to the public, we anticipate a demand much heavier than the supply, which will net gardeners very handsome profits.** Tastygreen seed is obtainable only from us and should be ordered early.

Home gardeners, do not fail to plant this delicious and tasty new vegetable in your garden this year. Market gardeners, plant a small acreage to it at least, and see for yourself how rapidly the crop sells at market!

1107—Pkg., 15c; ½ oz., 19c; oz., 33c; 2 oz., 59c; ¼ lb., $1.14; ½ lb., $2.17; lb., $4.25; 2 lbs., $7.95, postpaid.

Your Tastygreen is fine. Some leaves measured 30 inches long by 26 inches wide and were delicious.—Mrs. A. B. Diller, Box 487, Carrizo Springs, Texas.

Salzer's Earliest of All Tomato

Although introduced by us many years ago, Salzer's Earliest of All is still the leading extra early tomato, the earliest large-sized variety grown, and we believe, as we are constantly improving it, it will hold its position and will stay on top as the **Earliest of All.**

With us in the North it has always been a study to produce extremely early vegetables, such as will ripen and produce perfect fruit in a short time, and in Earliest of All our efforts have been successful. Everybody who has tried it, speaks of it in highest praise. **Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato.** Ripening as it does in about 108 days, in the North, it is especially well adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant our Earliest of All. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers. Mrs. Art Johnson, Clintonville, Wis., writes, **"I have used your Earliest of All Tomato for 3 years. It's the earliest tomato I have ever used."** Mrs. Helen H. Williams, R. D. 2, Earlham, Iowa, writes, **"I have planted Salzer's Earliest of All Tomatoes for a number of years and have always found them earlier, larger, and better than any other variety."**

1118—Price of Salzer's Earliest of All: Pkg., 15c; ½ oz., 27c; oz., 45c; 2 oz., 85c; ¼ lb., $1.60; lb., $6.25, postpaid.

A friend gave me some of your Earliest of All Tomato seed last year and they were two weeks earlier than my own.—Mrs. E. L. Blair, R. D. 1, Sarona, Wisconsin.

SALZER'S BREAK O'DAY

A new early tomato, disease-resistant, developed by the late Fred J. Pritchard, Senior Physiologist of the U. S. Department of Agriculture. **Break O'Day is about 10 to 15 days earlier than Marglobe, from which it was developed, with fruit fully as large.** The large scarlet, almost globular fruits mature in 120 days, they do not crack, are very solid, with few seeds, and are of delicious flavor. Very productive. **1162—Pkg., 15c; ½ oz., 33c; oz., 60c; 2 oz., $1.12; ¼ lb., $2.15; ½ lb., $4.14; lb., $8.00, postpaid.**

Break O'Day—The New Early Disease-Resistant Tomato

SALZER'S SCARLET TOPPER

Another heritage of the late Fred J. Pritchard of the U. S. Dept of Agriculture! **This new early variety produces beautiful red fruits, smooth, meaty, globular in shape and with an elegant flavor.** Scarlet Topper is enormously prolific and therefore should have rich soil to develop its heavy set of fruit to large size. **Vines are medium dense, erect, and SELF-TOPPING.** The main shoot, after forming two or three flower clusters, usually terminates in a flower cluster, checking vegetative growth much the same as cutting out the top, hence the name. Self-topping ability, earliness, prodigious yield, color and quality, all combined in one, make this one of the finest of all tomato introductions. Not disease-resistant however. 122 days. **1163—Pkg., 25c; ½ oz., 82c; oz., $1.50; 2 oz., $2.75; ¼ lb., $5.25; ½ lb., $10.35; lb., $20.00, postpaid.**

SALZER'S EARLIANA

An extra-early deep red tomato, widely grown in all sections of the country. It is very productive bearing good sized fruit, uniform in size (about three inches in diameter), with solid, thick flesh. Good shipper. Matures in about 118 days. **1117—Pkg., 10c; oz., 27c; 2 oz., 49c; ¼ lb., 93c; ½ lb., $1.80; lb., $3.50, postpaid.**

BONNY BEST TOMATO

Also known as Chalk's Early Jewel. An early bright red tomato, large, smooth, and finely flavored, **producing heavily and continuously throughout the season.** A splendid main crop variety. Our strain is especially bred.

The fruits are very big, handsome, very solid and deep through. Of bright scarlet color, ripen right up to the stem without any cracks or green core. Flesh thick, with comparatively few seeds and of sweet flavor. A good shipper. 125 days. **1114—Pkg., 10c; oz., 25c; 2 oz., 43c; ¼ lb., 81c; ½ lb., $1.55; lb., $3.00, postpaid.**

Plant a Garden This Year

SALZER'S DWARF CHAMPION

Quite distinct from the other varieties in habit of growth and foliage. Good sort for the home garden as the plants, owing to the peculiar upright growth, take up but little room and yield abundantly. The plants stand up almost like small trees. Ripens early; of medium, uniform size; deep glossy red with purplish tinge; round, smooth, free from cracks. A very desirable sort. **1156—Pkg., 10c; oz., 33c; 2 oz., 63c; ¼ lb., $1.19; lb., $4.50, postpaid.**

SALZER'S NEW GLOBE

An outstanding variety, fruits perfectly round, medium size, purplish red color, flesh solid and a great shipper.

It is always smooth, of firm flesh and few seeds; ripens evenly; color, a fine glossy rose, tinged with purple, and without the slightest tinge of yellow at any stage of ripening. Matures in 125 days. **1151—Pkg., 10c; oz., 32c; 2 oz., 58c; ¼ lb., $1.13; lb., $4.25, postpaid.**

Bonny Best or Chalk's Early Jewel

SALZER'S JUNE PINK

A large and decidedly pink-fruited variety, vines of spreading growth. The fruits average about 5 to 6 ounces in weight, are nearly round and slightly ribbed. Flesh is solid, of fine texture and best quality. It is a prolific bearer, clusters of six to eight large fruits being borne close to the main stem. Is also known as the Pink Earliana. **Of great value to the gardener who grows for markets where pink tomatoes only sell readily.** Matures in 120 days. **1141—Pkg., 10c; oz., 35c; 2 oz., 65c; ¼ lb., $1.24; ½ lb., $2.42; lb., $4.75, postpaid.**

SALZER'S RED HEAD

We introduced this tomato last year and the numerous reports received indicate it is giving great satisfaction. **It is very early, maturing in about 120 days, reaches a good large size, is extremely productive and bears continuously.** Fruits are bright red, nearly globe-shaped, and are very meaty with but a very small seed cavity. Ripens fully and uniformly to the stem, to a rich red color, vines are of medium growth and seem practically resistant to blight. It is an excellent canning variety. If you did not plant it last year, be sure to try out a small patch at least, this year. **1128—Pkg., 10c; oz., 35c; 2 oz., 65c; ¼ lb., $1.24; lb., $4.75, postpaid.**

SALZER'S YELLOW PONDEROSA

Same fine characteristics as the Ponderosa described on Page 61, except that the color is a rich golden yellow. Paul Schur, Vernon, Texas, writes, **"I grew your Yellow Ponderosa Tomato and raised fruits weighing 1½ to 2 pounds and measuring 5 to 6 inches in diameter. Not only I, but my neighbors as well, think they are unbeatable for quality." 1179—Pkg., 10c; oz., 52c; 2 oz., 94c; ¼ lb., $1.77; lb., $6.75, postpaid.**

I have raised your Earliest of All Tomatoes for a number of years and have never found one to excel them in earliness or quality.—Mr. P. G. Stanley, 721—1st St., N. E., Madison, S. D.

SALZER'S IMMENSE FERRIS WHEEL TOMATO

SALZER'S FERRIS WHEEL

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. It is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. Every garden in the U. S. should contain at least a few tomato plants. Plant some this year!

Salzer's Ferris Wheel is of the large Ponderosa type and averages about 1¾ pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds. Fruits have thick, solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich, dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 142 days. A grand tomato for the home gardener as well as for market gardeners. Mr. H. W. Hannebaum, 2405 Stuart St., Indianapolis, Ind., writes, **"Your Ferris Wheel Tomato is the best and biggest we have ever grown. The crop is sure and quality and flavor are fine."** Mr. W. H. Beasore, Oakhurst, Ill., writes, **"Your Ferris Wheel Tomato is the greatest I ever raised. Had some weighing 2½ pounds. They excel all others raised here."**

1139—Pkg., 15c; oz., 55c; 2 oz., $1.05; ¼ lb., $2.05; ½ lb., $4.05; lb., $8.00, postpaid.

SALZER'S IMPROVED PONDEROSA

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Our seed stock of this strain is the finest obtainable, and while very often large tomatoes, from their very size, are rough and have a tendency to split, we have developed and selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so. Note the large size and perfect condition of the tomato in the illustration.

Vines are vigorous and productive. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. **To all who desire large size, solidity and flavor, we unhesitatingly recommend it.** Requires about 140 days to mature. Chas. Stone, Bishop, Calif., writes: **"Bought one package of Salzer's Improved Ponderosa last year and took first prize with them at the County Fair."**

1142—Pkg., 10c; oz., 48c; 2 oz., 86c; ¼ lb., $1.60; ½ lb., $3.12; lb., $6.00, postpaid.

Salzer's Select Stone

King of the red tomatoes! The leading main crop variety, extensively grown by market gardeners, ideal for the home garden. Grown extensively by canners for canning, catsup, tomato soup, etc. An excellent shipper.

Vines are large, strong and productive. It is a smooth, large tomato, nice and solid, free from core and cavity. Nearly round in shape. The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 135 days.

1122—Pkg. 5c; oz., 22c; 2 oz., 39c; ¼ lb., 74c; lb., $2.75, postpaid.

1132—Select Stone, Salzer's Cliffwood Farm TRIPLE-A-TESTED—A special reselected strain certified by THREE-WAY tests: **Pkg., 10c; oz., 30c; 2 oz., 56c; ¼ lb., $1.07; ½ lb., $2.05; lb., $4.00, postpaid.**

SALZER'S NEW, SUPERB TOMATO

To Prevent Substitution, the Seed of Salzer's Peak of Perfection Tomato Has Been Stained VIOLET

Salzer's Peak of Perfection Tomatoes

Peak of Perfection

COLOR-TRU SEED—The seeds of this variety have been stained VIOLET to insure customers receiving true seed. Accept no other.

If it is size you want, and just a lusclous, deliciously good, all around tomato, then you must plant Salzer's Peak of Perfection! A tomato that is in a class by itself, a tomato of monstrous size!

We gave free seeds of this tomato to our customers and friends in 1927 under the name of New Wonder and offered prizes for the largest tomato grown and for the best name for this beauty. Mr. Acro Castle, Hueysville, Ky., won the prize of $25.00 cash for the largest tomato with a weight of 4 pounds 7 ounces. **Think of a monster tomato like that!** Mr. John Wilkinson, Harmony, R. I., writes, **"I want to state that your Peak of Perfection is the most splendid tomato I ever raised."** Mr. R. C. Gehlker, 6652 Kennedy Ave., Cincinnati, Ohio, writes, **"We were more than pleased with your Peak of Perfection Tomato."** Mrs. Raymond Turnbull, R. D. 4, Toulon, Ills., writes, **"I never had nicer tomatoes than I had last year from your Peak of Perfection."**

Customers and friends throughout the entire country planted this fine strain last year again, and everyone had heavy delicious tomatoes, the best ever. Peak of Perfection is of immense and monstrous size with remarkably solid, meaty flesh. One tomato sliced is more than sufficient for the ordinary family of four or five.

Peak of Perfection is practically free from seeds, which naturally makes the seed harder to get and a bit more expensive, but it is well worth the slightly higher price. The tomatoes are of a beautiful appearance, uniformly large and smooth, with a rich dark crimson skin, meaty, and have a delicious, melting flavor. **All esteem it the finest flavored tomato they have ever eaten.** But, combined with this delicious flavor, is the enormous size! **Think of one single tomato weighing almost five pounds.** Thousands of people grew fruits weighing 3½ pounds, 3, 2¾, 2½, 2 pounds, etc.

PEAK OF PERFECTION should be in every garden this year. Home gardeners will point to the luscious fruits with pride—market gardeners will reap big profits. It succeeds in every section of the United States, and bears immense crops of large tomatoes of the best quality.

1131—Pkg., 17c; ½ oz., 33c; oz., 62c; 2 oz., $1.16; ¼ lb., $2.20; ½ lb., $4.25; lb., $8.25, postpaid.

Immense Tomatoes Have Been Grown from Salzer's Oxheart Tomato Seed!

(Greatly Reduced in Size)

Salzer's Oxheart

SALZER'S OXHEART TOMATO

But here, sir, you will find the last word in tomatoes! **Attractively different shape—looks almost like a Delicious Apple, doesn't it?—large size, unsurpassed table qualities, heavy yielder, healthy vines—it is really something novel and so good, you will like it immensely.**

The skin is smooth, pink in color, and the fruits are almost seedless. The flesh frequently shows an inch thick, without a single seed cavity, and in flavor it is of the first class, luscious and delicious. Owing to its recently being developed, it is not yet entirely true to type, but almost all of the seed will bear oxheart-shaped tomatoes, and the balance of the fruits will be very desirable. **1177—Pkg., 15c; ¼ oz., 22c; ½ oz., 39c; oz., 74c; 2 oz., $1.35; ¼ lb., $2.64; ½ lb., $5.15; lb., $10.00, postpaid.**

Your Oxheart Tomato Seed gave me bushels of the finest tomatoes, some weighing 2 pounds 2 ounces each.—Mr. Henry A. Ulker, Box 33, Adams, Wisconsin.

SALZER'S MARGLOBE

A new wilt-resistant tomato that we introduced in 1927! Marglobe is a cross between the Marvel and Globe tomatoes, developed by the U. S. Department of Agriculture, combining the second earliness of the former with the fine table quality of the latter. **Marglobe is of fine scarlet color, globe shaped, of fine texture, delicously mild in flavor, and wilt-resistant to a marked degree.** Plants are of vigorous and heavy growth.

For both the home gardener and the truck gardener Salzer's Marglobe "Wilt-Resister" tomato is going to prove a boon—taking a lot of the guesswork out of tomato-raising and putting a lot of tomato-profits into the grower's pockets.

We have a record of one plant, on diseased soil, producing 107 large, fine round, best quality tomatoes. Customers will make no mistake in planting Marglobe where the ordinary varieties have been giving unsatisfactory yields because of wilt.

1130—Pkg., 10c; ½ oz., 17c; oz., 32c; 2 oz., 58c; ¼ lb., $1.13; ½ lb., $2.17; lb., $4.25, postpaid.

SALZER'S "NORTON" WILT-RESISTANT

If you have been troubled with wilt, plant the Norton Wilt-Resistant Tomato. In tests on diseased soil, the Norton produced an excellent crop, almost free from wilt, while 8 other varieties were nearly destroyed. **Has yielded 300 bu. to the acre on soil affected by wilt, while other varieties next to it, yielded 25 bu.** The tomatoes ripen nice and solid on the vines. Has a firm, solid skin, is a wonderful shipper, of fine flavor, meaty, few seeds and very tender. Is a mid-season tomato, globular, and of a beautiful scarlet color. It develops a very lusty system of roots and a strong, rugged vine, with luxuriant, rich dark green foliage. **1129—Pkg., 10c; oz., 30c; 2 oz., 56c; ¼ lb., $1.07; ½ lb., $2.07; lb., $4.00, postpaid.**

SALZER'S MATCHLESS

A very dependable, very large, smooth, second early tomato, in color, a beautiful cardinal red. **Salzer's Matchless is one of the best main crop varieties, it is quite prolific, exceedingly solid,** and matures a little earlier than the Select Stone. A good canning variety. One of the very best for market gardeners and truckers and equally desirable for the home gardener.

1180—Pkg., 5c; ½ oz., 15c; oz., 27c; 2 oz., 49c; ¼ lb., 93c; ½ lb., $1.80; lb., $3.50, postpaid.

1191—YELLOW PEAR. Rich, clear yellow, otherwise identical with Red Pear.

1186—RED PEACH. Blended deep rose and orange. For preserves, pickles and exhibition. Both the Red and the Yellow Peach Tomatoes resemble a peach in size and shape. The skin is thin, covered with slight bloom and peels off like that of a peach.

1190—YELLOW PEACH. Clear lemon yellow, otherwise same as above.

1185—RED CHERRY. Small, round fruits, one-half inch in diameter, of bright scarlet color. Widely used for salads and for pickling.

Our Asters were wonderful last year. Everyone admired them very much.—Mrs. Timothy Slattery, 69 Wellington S Malone, New York.

SALZER'S NEW SUNSHINE ASTERS

A new type of aster of singular beauty and great merit. You will be impressed and delighted with the large flowers which are 4 to 6 inches in diameter and which are half double, exhibiting the grace and beauty of the single aster, but greatly enhanced by a cushion center of tiny quills of a contrasting color. The golden yellow ground-tone of the quilled center petals, harmonizes beautifully with the pink, blue, lilac and white of the outer petals, which form a charming looscly curled circle. The plant is of branching habit, bearing its lovely flowers on long and strong stems, making it invaluable as a cut flower.

The delicate beauty of this Aster will appeal to every garden lover who wants exquisite flowers for garden decoration or for cutting. We offer the following good range of colors:

1767—**White** 1769—**Pink** 1771—**Mixed**

Any of above, per Pkt., 15c; ⅛ oz., 75c; ¼ oz., $1.25. One packet each of above four separate colors, for 50c; ⅛ oz. each, for $2.50.

Crimson Giant Aster is a most beautiful type. 1674—Pkt., 10c; ⅛ oz., 30c; ¼ oz., 50c.

Salzer's Beauty Aster

SALZER'S BEAUTY ASTERS

EVERLASTING ASTER

1747—**Everlasting Flesh.** This curious Aster was found in our fields a few years ago and it has retained its peculiar characteristics during the three years we have been propagating it. Pkt., 75 seeds, 12c; ⅛ oz., 25c; ¼ oz., 40c.

SALZER'S GIANT BRANCHING

Wilt-Resistant Asters

And now everyone can grow Asters! **While not entailing the huge monetary loss caused by the complete failure of crops of cabbage, melons, and tomatoes, wilt or stem-rot has deprived many flower lovers in sections all over the United States, of this desirable flower, the Aster.** Loss of seedlings or transplanted plants, stunted, one-sided and off color plants in those that survive, dark colored streaks in the stem, yellowing of the upper leaves and death of the lower leaves are characteristics of wilt or stem-rot. **The wilt organisms are capable of prolonged existence in one's soil and the only remedy is WILT-RESISTANT SEED.**

Through the labors of Dr. L. O. Kunkel at the Boyce Thompson Institute and of Prof. L. R. Jones and Dr. R. S. Riker at the University of Wisconsin, wilt-resistant aster seed is now available. **This seed is practically immune to the ravages of wilt and produces an abundance of flowers on aster sick soil, soil upon which ordinary seed would not possibly grow.** In one severe test, plants from this wilt-resistant seed grew splendidly while 93% from ordinary seed succumbed.

We can offer a mixture only of wilt-resistant seed this year, composed of varieties mixed, from the American Branching type, pink and blue, Ostrich Feather, rose, Crego, rose, Royal blue, and Heart of France, red, all mixed. 1737—Pkt., 25c; 1/16 oz., 60c; 1/8 oz., $1.10; 1/4 oz., $1.90.

Salzer's Wilt-Resistant Asters

SALZER'S PEERLESS YELLOW ASTER

It has been difficult in the past to get a good yellow Aster. **We have been working constantly for several years and have at last developed one that is far superior in every way to anything heretofore offered to the public.** The plant grows about two feet high, bearing numerous flowers of good size and form, petals slightly incurved but without any trace of quills, about late mid-season in maturity. **The color of the flower upon opening is a deep yellow, changing to lighter yellow as the flower ages.** This new and distinct color in Asters will appeal to all who desire the unusual in their gardens. 1727 — Pkt., 20c; 1/16 oz., 60c; 1/8 oz., $1.00; 1/4 oz., $1.75.

Peerless Yellow Aster

Salzer's California Giant Asters HA

This marvelous type is the finest Aster in cultivation today, and commands the highest price at the cut-flower markets of all of our large cities. No less, does it make the best display of any Aster in the garden.

It is a cross between the Beauty Type of Aster and the Crego Aster, combining the vigorous tall growth of the former with the lovely, double, large flower of the latter. Salzer's California Giant is practically non-lateral, but instead, carries its blooms at the end of its long stems, without the small side branches, producing enormous flowers of wonderful substance on strong, stiff stems 20 to 24 inches long. The flowers measure 5 to 6 inches in diameter, with long petals that fluffily curl across each other and produce an exquisite bloom that has no equal.

Wherever exhibited, this superb Aster has won prizes and received awards of merit.

Mrs. Lester L. Rand, R. D. 3, Auburn, Maine, writes, "Friends thought that the California Giant Asters that I raised had been bought from a florist. The first blossoms measured six inches in diameter." Mrs. Minnie Tatro, R. D. 1, Geneva, Nebraska, writes, "We had lovely Asters from your California Giant Aster Seed." Mrs. Mable La Mont, Blue Rapids, Kansas, writes, "No doubt you will be glad to know that I received a Blue Ribbon on your California Giant Asters and on your Crego Asters at the Marshall County Fair this fall."

Explanation of Abbreviations Used in the Descriptions

HARDY ANNUALS, HA. These should be sown outside in April or May, according to season, latitude, and condition of soil, or they may be sown at a somewhat earlier date in a hotbed or greenhouse, the combining of the two methods being advisable, thereby providing for a succession of plantings if both sowings prosper. Seed sown under glass will also produce earlier-blooming plants than seed sown outdoors.

HALF-HARDY ANNUALS, HHA, HALF-HARDY BIENNIALS, HHB, and HALF-HARDY PERENNIALS, HHP. These may be sown indoors, as above directed, from March to May, and outdoors after the middle of May. Many of the Biennials and Perennials will bloom the first season if sown early.

HARDY BIENNIALS, HB, and HARDY PERENNIALS, HP, can be sown outdoors as soon as the soil is in good tillable condition. If sown early indoors, many of them will bloom the first season. Sowings made from July to September will produce well-established plants for the next season. These should be somewhat protected during the winter. Many seeds of Hardy Biennials and Hardy Perennials are of very slow germination, and seeds of such should not be condemned as bad if a quick germination does not show.

TENDER ANNUALS, TA, TENDER BIENNIALS, TB, and TENDER PERENNIALS, TP, can be sown in March in the greenhouse or in hotbeds in shallow boxes. Transplant to secure sturdy plants, which can then be planted outdoors after danger of frost is over, about May 15.

HHA, HHB, and **HHP** designate Half-Hardy Annuals, Biennials and Perennials.

HB and **HP** designate Hardy Biennials and Perennials.

TA and **TP** designate Tender Annuals and Perennials.

G designates plants generally grown indoors only in pots.

Any species or variety to which no letters are affixed are to be considered as Hardy Annuals.

I don't think I ever saw any nicer Snapdragons than those from your seed last year.—Mr. Jona S. Smucker, R. D. 1, Ronks, Pa.

SALZER'S ANTIRRHINUM OR SNAPDRAGONS HHB

Within the last few years Snapdragons have become immensely popular. This is not to be wondered at, as, whether used for cutting or for show in the garden, they are one of the most valuable flowers which can readily be grown from seed. We offer three distinct types, the large-flowering, tall-growing or giant, the equally large-flowered, half dwarf variety, and the dwarf Snapdragons.

Although they are really biennials, or short-lived perennials, they bloom freely the first season from seed. If cut back and potted up in September, they will bloom nearly all winter, making splendid house decorations. In our trials the seeds sown out of doors the first week of May came into bloom early in July, remaining in full flower until November. For earlier flowering, they may be started indoors or in a frame in March, transplanting them to the open when the weather is suitable. After exhaustive tests of scores of varieties we offer the following as the best in their respective colors.

Cosmos, Extra Early, Double Crested

Salzer's Cosmos HHA

One of our most popular annuals for tall borders and for cutting, producing thousands of artistic flowers in pure white, pink, and crimson shades, furnishing an abundance of bloom for autumn decorations when other flowers are scarce. We recommend sowing about the first of May in the open ground, in rows covering the seed ¼ inch, and when the plants are 3 inches high, thin out or transplant to 18 or 20 inches apart. When the plants are 1 foot high, the tops should be pinched out to induce a bushy growth. May also be started under cover and afterwards transplanted.

Any garden soil will grow Cosmos to perfection; frequent cultivation around the base of the plants will greatly benefit them. The Autumn Giant sorts produce the largest flowers, but bloom late; for extreme northern parts, sow the extra-early flowering type.

EXTRA-EARLY COLOSSAL

Seed sown in the open ground April 26th produced plants riotous with bloom July 19th, 2 months before the late-flowering kind. By careful selection they now bear gigantic flowers and will perfect their flowers in very short season localities.

2951—**Early Pink.** Very pretty; elegant shade of pink.
2952—**Early Crimson.** Very rich, showy, crimson scarlet.

Delphinium Gold Medal Hybrid

Individual Bloom of Salzer's Hollyhock Delphinium

DELPHINIUM, HOLLYHOCK STRAIN

The illustration of this wonderful new Wrexham Hollyhock Strain of Delphinium is just about the actual size of this giant-flowered new type, which is the greatest advance in present day Delphinii. The long, strong, graceful spikes of blooms of simply enormous size and beauty of form, combined with their hardiness and ability to winter through everywhere and to flower for several years, place Salzer's Hollyhock Strain in the forefront as the finest acquisition to the present day family of Delphinium. Whether for garden decoration or for cut flowers, Salzer's Hollyhock Strain stands alone for profuseness and size of bloom, length of spike, hardiness, and perfection of flower! We have grown specimens at Cliffwood Farms where the individual blooms measured four inches across.

The flowers are so large, so ruffled and so densely set, that the regal spikes resemble the pillared Hollyhock at its best, and they are almost as tall, reaching a height of four to six feet. We offer mixed seed only, containing all the blue shades known to Delphinium, including lovely shades of violet, mauve, lilac, purple, etc., and with interesting modifications in the "eye" of the flower, the mixture containing both single and double flowers. The seed will produce handsome flowers in seven months after sowing. Start the seed indoors in March and transplant to the garden in April or May to have flowers in September. 1979—Pkt., 35c; 2 pkts., 60c; 1/32 oz., $1.50; 1/16 oz., $2.75; 1/8 oz., $5.00. Strong One Year Plants: Each, 39c; 3 for $1.10; 6 for $1.90; dozen, $3.50, postpaid.

All of the seeds I purchased from you germinated dandy and I have had wonderful flowers all summer.—Mrs. A. M. Johnstone, Box 145, Arlington, Vermont.

DIANTHUS OR PINKS

The varieties classed as annuals are really biennials, but are treated as annuals and may be sown out of doors when the danger from frost is past, and in a few weeks' time they are a mass of bloom, continuing so until after hard frost. OTHER CHOICE EVERLASTINGS

Strawflowers and Everlastings really serve two purposes, as in addition to furnishing the garden with a wealth of bloom throughout almost the entire summer, the flowers of all of them may be dried and kept for winter bouquets, imparting a delightful bit of color to the rooms during the winter months.

HELICHRYSUM OR STRAWFLOWERS

One of the very finest of the well-known "Everlastings." Large, full, double, daisy-like flower heads with prominent centers and stiff overlapping scales, produced in various bright shades on stems of good length. Splendid for cutting. Highly desirable also as dried flowers and for use in making winter bouquets. This is undoubtedly the most popular of the "Everlasting" flowers. The new and improved varieties that we catalog, are showy and attractive when grown in the garden, and they keep well as cut flowers. When dried, their bright and brilliant colorings make beautiful house decorations during winter.

The plants grow readily from seed sown in the open ground when the trees are starting out in leaf, and in order to allow them to obtain the maximum development, thin the plants out to at least one foot apart. Those flowers which you desire for winter decorations should be cut with as long stems as possible when they are about one-third open. The foliage should then be stripped from the stems, the flowers tied in small bunches, and hung (flowers downward) in some dark, dry, cool place until cured.

Strawflowers grow from two to two and one-half feet high and are easily grown, succeeding in any good garden soil. Very effective in beds and borders. We offer the following choice colors:

They succeed best in a light soil, with full exposure to the sun.

SALZER'S FROST PROOF PANSIES

Pansies HHB

(Heartsease)

Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and will bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months.

The flowers themselves are very large, often measuring 3 inches across, and are produced in a beautiful variance of colors from deepest black to snow white. Mrs. J. W. Webb, R. D. 1, Box 301, Roanoke, Va., writes, **"One packet of seed gave me a lovely bed of Pansies. They were in bloom January 23rd."** Miss Rhoda Cole, Okemah, Okla., writes, **"I picked Pansies December 24th, and they were lovely."**

We are able to give you varieties in straight colors as listed, or straight blended Cliffwood mixture in which all colors, bronze, blue, mahogany, yellow, mauve, black, etc., are represented. Have pansies after all other flowers are killed by frost.

For years our specialty in flower seeds has been Sweet Peas, and in 1928, our 60th Anniversary—our Jubilee Year,—we offered the following, one of the most complete list of varieties ever offered by any seedsmen. You will find in the varieties below, a wide and brilliant array of colors and shades, a list that will delight the specialist and layman alike, and more than that, a list reasonably priced. Years of labor and much money has been expended to get the varieties of this beautiful flower true to type, very early, so that short season sections may enjoy them, and to breed into them immense size and brilliancy of color.

The flowers of Salzer's New Giant Early Orchid Flowering Sweet Peas are of extraordinary size, the largest of all Sweet Peas, they are beautifully waved, and they are usually borne four to a stem. They commence blooming two to three weeks ahead of all others and surpass all others in brilliant coloring. If kept cut, they bloom over an unusually long period. Regardless of price, our Northern Grown Sweet Pea seed cannot be surpassed for size and profusion of bloom. The following superb sorts are the best of their class.

New Curled and Crested Zinnia

I had beautiful Zinnias last year from your seed. They were exceptionally large and colorful.—Mrs. Edward Britt, 12 Waterbury Ave., Whitesboro, N. Y.

LARGE FLOWERING DWARF ZINNIA HA
(YOUTH AND OLD AGE)

Such rapid strides have been made in the development and improvement of this useful class of annual flowers that the modern Zinnias would hardly be recognized by the gardeners of a generation or two ago. The old-fashioned Zinnias were stiff and prim and their colors were dull and raw, but the Zinnias of today are elegant in form and rival even the tulips in brilliancy and variety of color. Certain it is that few of our common flowers produce such a gorgeous display over as long a period with only a minimum of care.

The seed may be started in boxes indoors during March or sown directly in the open ground early in May. Transplanting, if necessary, should be done while the plants are still quite young, preferably when they are only about 2 or 3 inches high. They will grow almost anywhere except in shade, but they do best in a fairly rich, medium heavy soil and appreciate an occasional watering in dry weather. In thinning or transplanting leave the young plants plenty of room in which to develop; the large-flowering varieties should stand at least 1½ feet apart.

Large Flowering Dwarf. The Large Flowering Dwarf Zinnias grow bushy, compact plants about 15 inches high, bearing immense, double flowers.

Each of the undernoted colors: Pkt., 10c; ⅛ oz., 20c; ¼ oz., 35c.

2577—**Orange**	2579—**Rose**	2581—**White**
2578—**Pink**	2580—**Scarlet**	2582—**Yellow**

1589—One packet each of the above 6 separate colors, 50c.
2583—**Mixed, all colors.** Pkt., 10c; ⅛ oz., 20c; ¼ oz., 35c.

2572—**GIANT SHOW** (Grandiflora Robusta Plenissima). Huge flowers measuring often five to six inches across, semi-globular and very double. Grand and long-lasting effects can be produced in beds and borders with this new race. Plants grow about three feet high. Mixed colors. Pkt. 10c; ⅛ oz., 20c; ¼ oz., 35c.

2576—**VICTORY ZINNIAS.** A very distinct variety, with large densely double quilled flowers. Mixed colors only, the colors being mostly in orange, russet, old rose and other autumn tints. Pkt., 15c; ⅛ oz., 50c; ¼ oz., 85c.

2769—**RED RIDING HOOD ZINNIAS.** A very pretty dwarf Zinnia only a foot high and covered all over with little round bright scarlet flowers about an inch across and very double. Very effective for borders. Pkt., 10c; ⅛ oz., 35c; ¼ oz., 60c.

A Bed of Large Flowering Dwarf Zinnias

Salzer's New Dahlia Flowered Zinnia, Crimson Monarch

NEW DAHLIA FLOWERED ZINNIA HA

Besides producing by far the largest flowers of all the Zinnias, the Dahlia-flowered varieties are distinguished by being nearly as deep in the center as they are wide, with smaller individual petals than the ordinary varieties, but many more of them. Moreover, their colors are softer and more pleasing, being characterized by blended shades and pastel effects which, with the slightly reflexed and closely overlapping petals, give the whole flower the appearance of a fine satin cushion. The plants are tall and vigorous, producing a wealth of immense blooms from July until frost.

We offer the most popular shades:

2585—**Exquisite.** Light rose, center deep rose. Most pleasing color in Zinnias.

2586—**Old Rose.** A charming old rose shade. Very popular.

2587—**Golden State.** Deep yellow in the bud, turning to clear rich orange in full bloom.

2588—**Crimson Monarch.** Striking crimson. Enormous flowers, often 8 inches in diameter.

2589—**Dream.** Deep lavender turning to purple. A rare color in Zinnias.

2590—**Polar Bear.** Pure white.

2591—**Buttercup.** A very pleasing shade of rich golden yellow.

SALZER'S CALIFORNIA GIANT DOUBLE ZINNIAS

This fine new type has smaller centers and more loosely placed petals than the old Large Flowering Dwarf Zinnias. The size of the flower has been notably increased over the Giant Show type. The petals are decidedly imbricated and the flower from bud to bloom assumes a succession of graceful forms.

The flowers are truly giant in size, frequently measuring 6½ to 7 inches in diameter, and are borne on long and strong stems. When cut the graceful flowers last exceptionally long in water, and make a lovely bouquet. Everyone who has seen them has greatly admired this lovely new mammoth type of Zinnia, and its lovely range of colors. We offer it to our customers with the confidence that it will be a most welcome addition to the flower garden.

2740—Cerise Queen | 2743—Rose Queen
2741—Lemon Queen | 2744—Scarlet Gem
2742—Orange King | 2746—Salmon King
2745—Finest Mixed

Any of above, 14c per packet; ⅛ oz., 75c; ¼ oz., $1.25. One packet each of above six separate colors, for 70c; ⅛ oz., each of above six, for $3.95.

I wish to tell you that your California Giant Zinnias were the largest and the most colorful I ever saw.—Mrs. R. Greene, 727 E. 6th St., Duluth, Minnesota.

Whether large or small, the finest Rockeries are to be had from Salzer's Seeds

PERENNIAL SEEDS FOR THE ROCK GARDEN

One need not have large grounds in order to have a beautiful rock garden. Large rockeries with a greatly varied assortment of plants are most desirable, but a wide variety of plants, a great deal of satisfaction, and lovely effects, may be had from a rockery three or five feet in diameter built conspicuously on the lawn or placed in a corner of the garden. Bordering steps, walks, etc., and encircling the garage or one side of it, with rocks, will also prove effective.

Planting seeds is inexpensive, and while many of the perennial seeds do not bloom until the second year, one has lovely verdure the first year and flowers thereafter. For plants, see Perennial Plant Section. We list only those perennials most easily grown from seed.

Salzer's Crimson Rambler

SALZER'S Hardy Climbing Porch Roses

Salzer's roses are strong two year old American grown roots, budded or grafted, which we believe are much superior to roses on their own roots. Budded plants are more vigorous, they produce finer flowers, they bloom earlier and are as permanent and as hardy as "own root" roses. Salzer's budded or grafted stock is preferred by all who have had experience with roses.

In the following choice list of Climbers, the best of their class, we offer only strong, two year old, field grown roots.

AMERICAN PILLAR—A single flowering variety of great beauty. The flowers are large, often 3 and 4 inches across and of a lovely shade of **pink with a clear white eye** and cluster of yellow stamens. These flowers are borne in immense bunches and a plant in full bloom is wonderfully attractive. **Each, 35c; 3 for 99c, postpaid.**

CLIMBING GRUSS AN TEPLITZ—**Vivid fiery crimson,** an exact duplicate of the bush rose of this name except that it is a vigorous climber, producing a sheet of dazzling bloom. Superb for pillars. **Each, 50c; 3 for $1.44, postpaid.**

CLIMBING LOS ANGELES—A luminous **flame pink with golden shading** at the base of the petals. The buds and blooms are of exceptionally good form and sweetly fragrant. The blooms are identical with the bush variety. Climbs vigorously. **Each, 65c; 3 for $1.85, postpaid.**

CLIMBING MARY WALLACE—Large, well formed, semi-double flowers of a bright, clear **rose pink with a salmon base** to the petals. Very free flowering, the large blossoms usually four to five inches in diameter. **Each, 45c; 3 for $1.29, postpaid.**

CLIMBING AMERICAN BEAUTY—Hardy, strong growing with foliage of bright glossy green. Blooms anywhere a porch rose will grow. Large blooms of soft, **glowing red, very showy. Each, 42c; 3 for $1.20, postpaid.**

CRIMSON RAMBLER—This rapid, hardy climber produces a marvelous profusion of **rich crimson** flowers in clusters. It reaches a height of 10 to 20 feet in a single season. One of the finest and most satisfying varieties. **Each, 39c; 3 for $1.12, postpaid.**

PINK DOROTHY PERKINS—Hardy, with fine glossy foliage, soft **shell pink** blooms of good size, very double and borne in huge clusters. **Each 34c; 3 for 97c, postpaid.**

AMERICAN BEAUTY

Azalea Snow

AZALEA

Charming, colorful plants that were originally imported into California from Japan, and then found their way East. While not exactly new, they are still quite scarce. **They are simply covered with flowers in their blooming period, and are one big lovely, attractive mass of bloom.**

Azaleas make superb garden plants, setting them out in the garden when the weather permits, choosing a position where they are somewhat shaded during the heat of the day, and then lifting them at the approach of frost. **They also make elegant subjects for shaded window boxes, for the porch and as house plants.** In potting them, use equal parts of leaf-mold and sand. When they have finished blooming, Azaleas may be carried over to the next year, but during their rest period, they must be watered and not allowed to dry out. Cultural directions sent free upon request.

SALZER'S BEAUTY BUSH

An exceedingly handsome, hardy, ornamental shrub which was recently introduced into the United States from the wilderness of China and Central Asia. The foliage and habit of growth of Salzer's Beauty Bush when not in flower, is very attractive, making it desirable the year round. Hardy as far north as Montreal.

Salzer's Beauty Bush (Kolkwitzia Amabalis) grows 6 to 7 feet high when mature, erect and twiggy, producing long arching branches which in spring are simply covered with clusters of small, tubular pink flowers of the honeysuckle type, borne in such profusion that the bush is one cloud of delicate pink. Its amazing floriferous qualities make it highly desirable. Beauty Bush has all the attributes of a beautiful shrub: Hardiness, year-round beauty in foliage and habit, and a remarkable show of flowers in its blooming period.

Mr. E. H. Wilson, former explorer for and now keeper of the Arnold Arboretum in Jamaica Plains, Mass., writes, **"Of the many valuable hardy shrubs which our gardens have received from the Orient, none is more lovely than Kolkwitzia Amabalis or Beauty Bush.** Related to the weigelas and abelias, this new plant exceeds them in hardiness and in beauty. **In early June, its sprays of abelia-like blossoms transforms it into a fountain of pink loveliness.** In the opinion of its introducer, Kolkwitzia Amabalis is one of the best hardy shrubs and it was he who suggested the name 'Beauty Bush.'"

To home owners who are always looking "for something better," we recommend Salzer's Beauty Bush very highly. **Price: Plants 12 to 18 inches high, field grown: Each, 69c; 3 for $1.98; 6 for $3.85; dozen, $7.45. Extra strong plants, 18 to 24 inches, field grown: Each, 88c; 3 for $2.55; 6 for $4.95; dozen, $9.50, postpaid.**

Salzer's Marvelous Beauty Bush

FLOWERING ALMOND. A most desirable hardy shrub, three to five feet high, growing more like a small tree than a shrub. **Because of its charming tree shape and its dwarf height, it is an elegant subject for lawn planting where a few conspicuous shrubs are desired.** It is valuable also, in that the flowers usually appear before the leaves, making it unusually attractive and showy.
—DOUBLE PINK. Branches loaded in May with large, double rose colored blossoms like small roses. **Each, 39c; 3 for $1.12; 6 for $2.17.**
—DOUBLE WHITE. Same as the above, except that the double flowers are pure white. **Each, 37c; 3 for $1.06; 6 for $2.05.**

STIM-U-PLANT— Stim-U-Plant is a plant food in tablet form, containing 11% Nitrogen, 12% Phosphoric Acid, and 15% Potash, and is one of the richest plant foods sold. These highly concentrated tablets produce immediate results, **promoting a luxuriant, vigorous and healthy growth and increasing the size and number of the blooms.** They are especially recommended for ferns. Stim-U-Plant builds up the soil, supplying the nitrogen, phosphoric acid and potash which are so often lacking. Full directions on each package. Instead of dissolving them in water, many of our customers write us that they use them also by merely pressing a tablet into the ground at the base of the plant, especially out of doors. They encourage faster growth in roses, shrubbery, etc., as well as in plants. We strongly recommend Stim-U-Plant.

Price of Stimuplant: Per Pkg., 25c; medium size (100 tablets), 75c; large size (1,000 tablets), $3.50, postpaid.

I have always been greatly pleased with your Shrubs and Plants.—Mrs. Etta Ross, Colchester, Vermont.

SALZER'S EVERGREENS

Note our low postpaid prices for these lovely evergreens! Salzer's Evergreens, with the soil removed from the roots, can be **shipped to any section of the country by parcel post.**

Formerly, Evergreens were all shipped Balled and Burlapped, the heavy weight of the earth causing enormous express charges to be added to the cost of the plant. **Salzer's method of shipping eliminates all this, and with our method of packing, one is virtually assured of a healthy growth under almost any soil conditions.** Naturally, there are extreme cases, and we cannot guarantee that every tree will live, but we do guarantee to replace at half-price, any Evergreen that dies the first year, if the customer will notify us before October 15.

The Evergreens we offer range from 10 to 24 inches in height, which is a desirable size to transplant. Larger trees make the cost almost prohibitive for the average home owner and with this size, one has a good sized Evergreen at a nominal cost. It may as well develop right in your own grounds as in the nursery, and you will have saved the extra cost. The illustrations are of the matured trees, showing what can be accomplished in a short time. **Salzer's Evergreens are ideal for planting on a lawn, boulevard, along a driveway, at terminal points of shrubbery, or to break the corner of the house, etc.**

COLORADO BLUE SPRUCE

Picture in your mind a perfectly shaped tree with an abundance of heavy foliage of a rich glistening blue tinge, flashing and sparkling in the sunlight, and you have only a faint idea of this magnificent variety. Its glory is its foliage. The planter must remember that in the spring of the year the Blue Sprucs are off color and when transplanted do not regain their bluish color until they make a good growth. It is possibly the most sought for evergreen tree today. **Each, 12-18 inches high, $1.85; 3 for $5.25, postpaid.**

NORWAY SPRUCE

This is the variety most used for Christmas Trees. Plant at least one this spring, and wire it with colored electric lights next Christmas. It is a good, rich, dark green color, but when the new spring growth lights up the branches with its silvery blue tips, it is most conspicuous and showy. Very hardy and desirable. **Each, 18-24 in. high, 95c; 3 for $2.60, postpaid.**

BLACK HILLS SPRUCE

A splendid evergreen for the lawn. **Hardiest of all, symmetrical, compact and bushy, lovely green to bluish foliage all year long.** Eventually reaches a height of 25 feet, but as it is a very slow grower, it is very frequently planted close to the house, alongside the porch, as a single specimen on the lawn, etc. It is a very satisfactory evergreen. **Each, 12-18 in. high, $1.75, postpaid.**

AMERICAN ARBOR VITAE

Very hardy. **Much used for hedges, screens, singly on lawns, and in tubs for porches, etc.** It is a handsome little tree, of slow growth, pyramid shaped, and eventually will be 10 to 12 feet high. **Can be trimmed and kept in any form and to any height.** The flat, finely carved, soft and flexible foliage in the summer is bright green above, yellowish beneath, and in winter changes to the richest tones of brown and bronze. **Each, 12-15 in. high, 75c; 3 for $1.95; 6 for $3.25, postpaid.**

GLOBOSA ARBOR VITAE

Of Delightful and Charming Formality.

One of the newer Arbor Vitaes that is very handsome. In shape it is absolutely round or globular, very dense in growth and does not require shearing. It does not grow over four or five feet tall. The Globosa is not as hardy as some Evergreens, however, and should be planted in protected places. **Each, 10-12 in. high, $1.59; 3 for $4.50, postpaid.**

PYRAMIDALIS ARBOR VITAE

One of the most beautiful varieties, very erect and regular in form, in growth, similar to the American Arbor Vitae above. **Of dense, compact, slow growth, narrow and columnar form, deep rich green color at all seasons, and hardy.** Lovely fern-like, soft foliage, and more dense than the American Arbor Vitae. **Each, 12-18 in. high, $1.45; 3 for $4.15, postpaid.**

MUGHO PINE

Mugho Pine is a low, compact grower, having many stems, and is of excellent green color. **The branches, tipped with the new growth in the spring, closely resemble tiny candlesticks all over the entire plant.** Should be in every lawn. Never grows over 4 to 5 feet tall and eventually spreads out to 6 feet wide. **Each, 9-12 in. spread, $1.10; 3 for $3.15, postpaid.**

LOS ANGELES

THE CUT AND COME AGAIN GLAD!

Here is a fine pink variety of recent introduction that we know will appeal to everyone. It produces large and perfectly formed. beautiful shrimp-pink flowers with a glowing orange-carmine blotch in the throat, on tall and graceful spikes.

The most remarkable feature of this superb Gladiolus is its ability to withstand cutting over a long period, and to constantly throw forth new blooms. Its lateral branches are produced so freely, that several cuttings may be made from one spike, and it has come to be known as the **"Cut and Come Again Glad."** Los Angeles is of such real merit, that it will appeal to all who want something a little bit different in their gardens. Grows 3½ to 4½ feet tall and has thrown twenty and more spikes of flowers to one bulb. We have an elegant stock of the large No. 1 bulbs which will produce the big, large flowers.

First Size Bulbs: Each, 8c; 3 for 21c; 6 for 39c; dozen, 75c; 25 for $1.40; 50 for $2.50; 100 for $4.85, postpaid.

BARGAINS IN GLADIOLI!

Everyone succeeds with Gladioli! They grow everywhere and anywhere, are never attacked by insects, and in addition to furnishing one with two to three months of solid bloom every summer, the bulbs increase in size and multiply rapidly each year.

We have an enormous surplus of mixed Gladioli. We are not going to sell them to other houses. Our customers are first. We want to give every single customer of Salzer's, whether new or old, the first chance to get bulbs of this beautiful flower for almost nothing. These bulbs will all bloom this year, will bear large flowers, every color of the rainbow is represented. Most people like a beautiful display in their yard, rather than just a few named varieties, so we offer them mixed. Don't pass by this most liberal offer!

FIRST SIZE BULBS

These are the big, large bulbs. They produce big, large blooms the same year planted, and the bulbs multiply rapidly. Many houses charge 15c to 25c each for these. Our price: **12 for 49c; 25 for 89c; 50 for $1.62; 100 or more at $2.98 per 100, postpaid.**

SECOND SIZE BULBS

Smaller bulbs but they grow just as big flowers and just about as many spikes of blooms as the First Size. But since they are smaller size, many people think they aren't much good. Most houses charge 8c to 10c each for these. Our price: **12 for 29c; 25 for 49c; 50 for 90c; 100 or more at $1.65 per 100, postpaid.**

THIRD SIZE BULBS

A big bargain! Not only will they produce Large Flowers this year but they will also produce almost as many blooms as the Second Size Bulbs! Our bargain price: **25 for 39c; 50 for 70c; 100 or more at $1.28 per 100, postpaid.**

Double Tuberous Begonia

Crested and Frilled Begonia

Bright Colors for Shady Places

Salzer's Tuberous-Rooted and Crested and Frilled Begonias are particularly desirable for shaded porch and window boxes and for outdoor planting in partially, and even in totally, shaded places, where, if they are planted in well drained light soil, they will produce more bloom than any other flower.

Crested and Frilled Tuberous Begonias

Salzer's Crested and Frilled Begonias are a greatly improved strain with flowers of immense size, and with beautifully frilled and wavy petals surrounding the prominently crested centers. The requirements of these and the Double Tuberous Begonias are few; some shade, or even total shade, light, rich soil or sandy leafmold, a well drained position, and plenty of water after they have started to grow.

We offer these wonderfully frilled and crested flowers, in the following choice colors, in started plants only, and make shipment in paper pot and original soil.

WHITE YELLOW RED PINK SALMON

Salzer's Double Tuberous Begonias

This lovely class is far superior to anything offered heretofore, and rewards one with immense, charming, double flowers in a lovely array of colors. Customers should note, however, that the same plant sometimes bears a single flower.

We offer the following colors, in started plants only, and ship in paper pot and original soil:

PLANT AND BULB DEPARTMENT

Salzer's Plants and Bulbs have a national reputation. They are the hardiest of any obtainable. They shoot up quickly and bloom early and freely, bearing flowers for a much longer time than less robust stock.

Mrs. A. T. Petertye, 629 7th St., Traverse City, Mich., writes, **"My President Cannas were beautiful and I have given your name and address to many who asked where I bought them."** Mrs. C. Strombeck, 11406 Church St., Chicago, Ills., writes, **"The Cannas that we bought from you were certainly wonderful."** Mr. John B. Thacher, Preston, Minn., writes, **"Your Cannas are always so large and beautiful."**

ORDER EARLY

We urge our friends to place their orders as early as possible. Last year we quickly sold out of different varieties, and although we have larger stocks on hand this spring, there is less likelihood of our having run out of some kinds, and your being disappointed, if your order is received early in the season.

TIME OF SHIPMENT

All plants are shipped when stock is ready and when the weather permits planting. For the south, orders are naturally filled much earlier than for the northern states. As orders are received, we book them and ship at planting time unless you instruct us otherwise.

HOW WE SHIP

To reduce weight and volume, plants are shipped without pots and with most of the dirt removed. However, if you wish us to ship house and bedding plants **in paper flower-pots with all of the original soil attached to the roots,** add 10c extra for each plant so ordered. Many of our customers want to receive their plants in the original soil and in pots, and this extra charge of 10c covers the additional labor and expense.

PRICES

All prices under this department are for delivery by mail, postage prepaid, unless otherwise specified. Express shipments are not prepaid. See footnote.

SALZER'S NORTHERN GROWN CANNAS

Cannas are the tallest and the bulkiest of the summer bedding plants and furnish a wide range of colors. They do well in all sections of the country and their noble proportioned foliage is extremely attractive, with rich shades of chocolate, red, green, and bronze. The most effective arrangement is a massed planting in one color, but they may also be planted to produce many striking effects which are beautiful. Cannas should not be planted less than twenty inches apart each way. Dig up bulbs in fall and plant again in spring. At the beginning of the season we send dormant bulbs; as the season advances, depending also upon the weather, we send out started plants, which will give one earlier flowers.

VEGETABLE ROOTS

RUST-PROOF WASHINGTON ASPARAGUS ROOTS

Get your asparagus roots direct from Salzer's celebrated Cliffwood Farms this year! This new variety is so rapidly replacing all other strains, that we have discontinued growing any but the Rust-Proof Washington Asparagus Roots. **The Washington type has been bred to resist rust. It has thick and heavy shoots, long and straight, and closely folded tips. It is a beautiful rich dark green color, darker green at the tips, and is a very heavy yielder.** You will be delighted with both the quality and appearance of this fine variety. Growing rapidly, it is the most tender of all! Plant these extra large roots and save from 1½ to 2 years' time in having your bed ready for cutting. Set roots 4 inches deep and 18 inches apart in rows about 4 feet wide, fertilizing well with stable manure or other fertilizer. The richer the soil, the better the crop. Plant 100 roots to 15 by 20 foot bed. Two-year-old roots can be cut the following year.

PRICES: One-year-old roots: 12 for 30c; 25 for 55c; 50 for $1.00; 100 for $1.90, postpaid. Not prepaid, 500 for $4.75; 1,000 for $8.95. Two-year-old roots: 12 for 49c; 25 for 90c; 50 for $1.35; 100 for $2.39, postpaid. Not prepaid, 500 for $7.75; 1,000 for $14.75.

CHIVES (Schnittlauch)

This plant should be more widely cultivated than it is. Chives are grown for the young leaf stems, which have a mild onion flavor. Makes a delicious dish, especially when prepared with cottage cheese. Also used extensively in soups, stews, etc. They are easily grown indoors in pots, for winter use. We offer only Cliffwood Grown Roots, which are noted for their fine quality and flavor.

Instead of purchasing horseradish prepared at the store, plant a few of our Cliffwood grown roots this year, grate it yourself, and notice the wonderful difference in taste. You will only need a trifling space for enough horseradish for the whole year, but be sure to plant Salzer's Roots. Horseradish does best in a rather moist, partly shaded location. We offer roots 5 to 6 inches long, which we consider the best length for planting.

SALZER'S SHADE TREES

Not only may much comfort as well as beauty be derived from shade trees but they help to retain the moisture in the ground. They perform a real service for man. When planting trees, use fine compost or top soil for filling in around the roots, plant deeply and firm well. Cut away any broken or bruised branches or roots. Never use manure unless it is thoroughly rotted. It is also important that there be proper drainage. Water should never stand in the hole where the tree is to be planted.

We offer the following trees in the six to eight foot size, priced for shipment not prepaid from our nurseries in Iowa. Salzer's trees are planted throughout the entire country and are offered to you at a most reasonable price.

PULLETS

We guarantee delivery 100 per cent of either Pullets or Cockerels, whichever you order! Salzer's Pride of Wisconsin Hybrid Pullets are easier to raise, possess greater vigor and vitality, have greater livability, feather sooner, mature quicker, are more disease resistant and lay better. They vary in color from a blackish brown with a tinge of yellow in the neck and hackle to a deep black brown.

They are greater layers of winter eggs, are hardy and vigorous, and yet they are gentle, quiet, tame and stand confinement well and still are very good foragers. They have an exceptionally plump breast and yellow skin, weigh from 6 to 8 pounds at maturity, and make a most excellent market bird after their laying days are over, commanding top prices. They are a cross between Rhode Island Red and Barred Plymouth Rock. Remember, we guarantee 100% live delivery of your order for Pullets. You get nothing but Pullets! Order early, giving us a shipping date.

COCKERELS

Salzer's Pride of Wisconsin Hybrid Day Old Cockerels have all of the superior advantages found in the Pullets, and mentioned above. 2 Your Golden Glow Seed Corn No. 4369 was the nicest corn in Green Lake County.—Mr. Gust Peterson, R.D.2, Box 100, Princeton, Wis.

Prices on These Two Pages Are Effective Until February 1, 1932

All field and farm seeds are listed net, F. O. B. La Crosse, Wisconsin, purchaser paying transportation charges. Bags are extra where noted. Prices are subject to change without notice. The prices on these pages are effective until February 1, 1932, or as long as our stocks last. If you do not order until after February 1, please send for the new price list. Should we have an excessive demand for any items and our stocks become depleted, we must buy additional stocks from reliable growers, but undoubtedly at high prices, and our own prices must then be changed. Prices on these two pages will therefore be void after February 1, 1932.

Order early and save money! Every year sees a scarcity of several varieties before planting time arrives, and prices invariably soar. If you are buying larger quantities of seed than are listed, write for special prices, or better still, send us a list of your requirements for a special quotation. Sow only high quality, carefully cleaned, northern grown seed this year. Our northern grown potatoes have a national reputation for yielding bumper crops all over the United States. We solicit both the large and small order, and every single order will receive the same careful attention.

-better vegetables

"After applying Vigoro," writes Ad Hennig, of Neenah, Wisconsin. "I had tomatoes three weeks earlier than the year before. They were of a better quality, more delicious, and uniform in size.

"The same success was evident with the rest of my vegetables."

Vigoro is the ideal plant food for lawns, flowers, gardens, shrubbery and trees. It is easy to apply; results are quick and certain.

Clean, dustless, weedless, and *Odorless!* Vigoro is not to be compared with any other plant food you have ever known. It isn't at all costly.

VIGORO

Specially prepared plant food

For the Lawn, Vigoro is the finest fertilizer and plant food obtainable. In making a new lawn, after the ground has been thoroughly prepared, apply 4 pounds of Vigoro per 100 square feet, mixing it thoroughly with the top soil. It is well, then, to wait one day before sowing the seed. After seed is sown, wet down thoroughly but carefully, so seed is not washed away.

On an established lawn, apply Vigoro early in spring, at the rate of 4 pounds per 100 square feet. Spread it evenly and then wet down thoroughly. Light applications of 2 pounds per 100 square feet, every six weeks thereafter, on both new and old lawns, will keep them beautiful and green through the season. Apply Vigoro evenly,—too much in one spot or heavy applications are wasteful and may burn the lawn.

A FEW DON'TS

Don't apply Vigoro on wet grass, plants or flowers. Wait until they are dry.

Don't allow Vigoro to come in direct contact with seed, foliage, or roots of plants.

Don't fail to water thoroughly after Vigoro is applied. This will prevent burning of grass, vegetable plants, and flowers.

Price of Vigoro: 12 oz. carton, 19c; 2 lbs., 38c; 5 lbs., 69c, postpaid. Not prepaid: 10 lbs., 85c; 25 lbs., $1.75; 50 lbs., $3.00; 100 lbs., $5.00.

LOCKED PLANT BANDS

The simplest way to handle plants for transplanting is to grow them in our Ready-To-Use Plant Bands. These bands are very economical. They make an ideal worm guard: in transplanting into the field simply put the band and all into the ground, thus preventing exposing the roots to the air, which always sets the plant back. By using these it is even possible to transplant sweet corn, cucumbers, squash, melons, beans, etc. We do not put bottoms in them, so that in the field the roots will not be hindered in any way.

5201—Postpaid: 2x2x2½ in. deep, 50 for 30c; 49c per 100; $1.00 per 250; $1.95 per 500.

5203—Size 3x3 in. pot with bottom, for Early Cabbage, Early Cauliflower, Cucumbers, Melons and Squash: 50 for 53c; 95c per 100; 250 for $2.15; 500 for $3.95, postpaid.

THE VEGETABLE SLICER AND CABBAGE CUTTER

5187—Every housewife needs a vegetable slicer. This is the best obtainable. It is strongly constructed and with ordinary care should last a lifetime. Is A-No. 1 for slicing cabbages, apples, carrots, cucumbers, radishes, etc. Five slices are cut with every stroke of the hand. **Price, 59c; 3 for $1.65, postpaid.**

BUG DEATH

5428—Kills all bugs and worms that chew leaves and foliage; it is non-poisonous, containing no Arsenic and Paris Green. May be used dry or in solution. It is in high favor among market gardeners, who use it extensively for cabbage and tomato worms, potato and cucumber bugs, etc. Use at the rate of about 12 lbs. per acre. **Price: lb., 20c; 2 lbs., 53c; 5 lbs., $1.00, postpaid.**

SALZER'S FAMOUS PEAT

The Vital Factor in Bringing Your Lawn to Perfection—The Necessary Element for Conditioning Your Garden Soil—The Ideal Top Dressing for Roses and Shrubbery

Salzer's Peat—Two Ozs. Absorb One Lb. of Water

Salzer's Peat, also known as Plant Humus, Garten Tonic or Garden Tonic, is the one big factor today in securing a beautiful lawn, in obtaining that perfect, friable soil for your garden, in securing the right top soil (the right mulch) for use around the bases of your roses, shrubs and perennials, in getting the best top soil for your window boxes and your porch boxes, and in securing a good top soil for your potted plants, for your ferns, and for your hanging baskets.

TO APPLY SALZER'S PEAT

simply pulverize it finely,—it will break up in your hands, —and scatter it evenly and as thickly as you wish over your lawn. Using a rake will help to get an even top dressing. Tamp it down with the bottom of the rake, or leave it to settle from the weather. Vigoro may still be used as a fertilizer for the lawn, but somewhat lighter applications may now be made. A top dressing of the lawn should be made in late April or early May. Another application may then be made in late September or next spring, whichever is desired. After that, if your lawn appears in good shape, no more should be required except as you wish to add patches here and there from time to time. On new lawns, prepare the ground as usual, apply a top dressing up to about ½ inch, and then sow the seed.

FOR YOUR SHRUBS

Roses, Perennials, etc., spread some of Salzer's Peat around the bases of the plants, up to about ½ inch deep. This makes an ideal mulch for your roses, shrubbery, garden plants, and perennials, and gives them the necessary root moisture.

SALZER'S PEAT

used in proper proportions, will bind together and give more body to loose sandy soil, will make heavy clay soil friable, **will make all soil highly retentive of moisture so that it will hold plant food and fertilizers,** it will help to prevent baking and caking, and it will condition your soil in general. **Every home owner will find Salzer's Peat a valuable adjunct in securing perfection in his lawn, roses, shrubbery, and general gardening.** Customers who think one bale will be too much, should club together with a friend, in order to obtain the low price per bale, or should send for a five pound sample.

100 Lbs. of Peat, Ready for Use on Your Lawn or Your Garden

SALZER'S PEAT

is a kind of soil formed by the partial decay of plants in swamps and drained lake bottoms. Peat bogs consist of the remains of many kinds of aquatic and marsh plants, but chiefly sphagnum moss which grows upward and decays partially below. **This produces more or less of a fibrous, spongy condition which makes Peat valuable for its porous, moisture-holding properties rather than as a plant food.** It has been indispensable in greenhouses and is now offered to the home gardener at a low price.

TWO OUNCES

of Salzer's Peat will absorb one pound of water. Think of the wonderful moisture holding properties of Salzer's Peat when used as a top dressing for your lawn! With Salzer's Peat on your lawn, an enormous amount of water from one rainfall will be retained and furnish moisture for the lawn over a very long period. With Salzer's Peat on your lawn, sprinkling every day will no longer be necessary. **One bale of Salzer's Peat will give a top dressing to about 800 to 1,000 square feet, or an area of about 25 x 40 feet or 50 x 20 feet. Applied thinner, it will reach farther and of course, applied heavier, it will not cover as much of an area.** Of late years, citizens have recognized the necessity of beautiful lawns, not only for the enhancement and beauty of one's yard or grounds, but also for the appreciation in monetary value that it gives to one's property. Salzer's Peat comes to you in bales of 100 pounds. Because of its porous nature, there may be some variance in the weight, either way. As a sample, we also offer the small sizes.

PRICE OF SALZER'S PEAT: 5 lbs., 64c; 10 lbs., $1.10, postpaid. Not prepaid: Half Bale (about 50 lbs.), $1.85; 100 lb. bale, $2.95; 5 bales, $13.95.

SALZER'S COARSE PEAT. Unexcelled for Poultry and Stable Litter. (Not recommended for lawns): **Half Bale (about 50 lbs.), $1.80; 100 lb. bale, $2.85; 5 bales, $13.75, not prepaid.**

With Salzer's Peat, Beautiful Lawns Are Possible Under Most Conditions

IMPORTED PEAT MOSS

Keeps poultry runs dry, clean and warm, and assures dry, clean bedding for cattle and horses. Weight, about 160 lbs. per bale. Price, shipped from our warehouses in Chicago, Kansas City, Indianapolis, or Brooklyn: Bale, $3.95; 5 bales, $18.95, not prepaid.

SALZER'S SPECIAL LAWN GRASS MIXTURE

Leaflet "How to Make a Lawn" is free for the asking.

Not the most expensive, nor yet the cheapest, **but the best general all around and all purpose Lawn Grass Mixture that we catalog, and the most popular.** In addition to a carefully blended mixture of the most satisfactory grasses, Salzer's Special Mixture contains the proper percentage of Dwarf White Dutch Clover, always useful and desirable for the lawn. Customers should not be guided by price alone, in purchasing their lawn grass seed, but should also consider quality and the final results. An abnormally low priced mixture may be very apt to contain considerable chaff and "padding," making it quite costly in the end. **Above all else, a beautiful lawn is to be desired, whether one's grounds be small or large.** Without it, neither shrubbery nor garden will display the house to advantage.

The lawns of some of our most beautiful La Crosse homes have been seeded with Salzer's Special Lawn Grass Mixture, the La Crosse State Teachers College, the La Crosse Parks, and our City and High Schools, as well as its having been used by thousands of customers throughout the United States. Mrs. K. A. Schindler, Clifton, N. J., writes, **"My lawn is just beautiful. You remember the seed was purchased from you."** Mr. A. A. Stee, 814 Broadway St., Silvertown, Ore., writes, **"The Special Lawn Grass Seed you sent me last year surely did fine."**

Salzer's Special Lawn Grass Mixture is a combination of grasses that produces a thick, velvety, closely interwoven turf, **that quickly attains a beautiful rich green color, and is ready for mowing in from four to six weeks.** Sow the seed early, as soon as frost is out of the ground, to enable the young grass to get a good start before any weeds appear. Contains no timothy. Sow one pound to 200 square feet.

4529—½ lb., 28c; lb., 49c; 2 lbs., 92c; 5 lbs., $2.25, postpaid. Not prepaid: 10 lbs., $4.30; 50 lbs., $21.00; 100 lbs., $41.00.

BOULEVARD GRASS MIXTURE

A mixture of grass seeds that has been especially blended for use on boulevards and between curbing and sidewalk, situations which are always subjected to harder usage and more tramping than the ordinary lawn. Contains no timothy. In this, as in our other mixtures, only the best grades of grasses are used. Sow one pound to 150 square feet. Sow only Salzer's Lawn Grass Seed this year and have the finest lawn you have ever had. **4533**—½ lb., 35c; lb., 63c; 2 lbs., $1.20; 5 lbs., $2.90, postpaid. Not prepaid: 10 lbs., $5.40; 50 lbs., $26.50; 100 lbs., $52.00.

SALZER'S LAWN GRASS SEED for EVERY PURPOSE

Terrace Mixture

For terraces and embankments, one needs a mixture composed of grasses that establish themselves quickly and make deep and well developed root systems. Salzer's Terrace Mixture meets these requirements by making a quick growth and, although forming a strong, dense system of roots, the grasses are fine-leaved and present a lovely appearance at all times. Use one pound to 100 square feet, sowing after a rainfall if possible, to avoid washing away the seed. Contains no timothy. **4534**—½ lb., 37c; lb., 65c; 2 lbs., $1.24; 5 lbs., $3.05, postpaid. Not prepaid: 10 lbs., $5.90; 50 lbs., $29.00; 100 lbs., $57.00.

Emerald Isle Grass Mixture

Salzer's famous low priced grass mixture—a big value at the price offered! Should not be confused with greatly inferior mixtures frequently offered at low prices. Customers report very satisfactory results with this bargain, all around, fine leaved grass mixture, priced ridiculously low. Use 1 lb. to 200 sq. ft. 4536—½ lb., 17c; lb., 29c; 2 lbs., 52c; 5 lbs., $1.25, postpaid. Not prepaid: 10 lbs., $2.30; 50 lbs., $11.00; 100 lbs., $21.00.

Salzer's Shady Place Mixture

Not all grasses are grown successfully in shade or partial shade, and **we have therefore prepared this mixture of fine grasses that are naturally adapted for this purpose.** We recommend sowing early in Spring, if possible before the ground is shaded by leaves to any great extent, using one pound to 150 square feet. If the ground has been densely shaded and is sour, it is well to apply some slaked lime (obtainable at any hardware store). Mrs. S. C. Glover, 6538 Stewart Ave., Chicago, Ill., writes, **"Your Shady Place Mixture has proved very satisfactory."** Mr. J. J. Harrington, Box 56, Monroe, Mich., writes, **"Your Shady Place Mixture gave fine results."** Contains no timothy. **4527**—½ lb., 30c; lb., 55c; 2 lbs., $1.04; 5 lbs., $2.55, postpaid. Not prepaid: 10 lbs., $4.90; 50 lbs., $24.00; 100 lbs., $47.00.

Salzer's Shady Place Mixture gave us wonderful results.—Mr. Henry M. Rhud, Box 272, Bismarck, N. D.

Sown with Radium Grass Seed

SALZER'S RADIUM LAWN GRASS

It is the easiest thing in the world to grow a beautiful lawn. How often in our own city, as well as in other towns, do we find people spending from $25.00 to $50.00 sodding a lot, when $3.00 to $5.00 worth of Lawn Grass Seed would do the work, would do it better and give a thicker swath and a greater growth than any sod you can find and put on anywhere. **There is nothing that gives quicker growth and a thicker sod than Salzer's Radium Lawn Grass Mixture. It produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, elastic turf, and is often ready for mowing four weeks from sowing.** This Lawn Grass is composed of a combination of various native and foreign, fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained from spring to winter, year after year, and without burning brown in summer.

Mr. Cyrll Marsh, 87 State Road, Ashtabula, Ohio, writes, **"We think there is no better grass seed than your Radium Lawn Grass No. 4526. Our soil here is very sandy (close to Lake Erie) but we have a beautiful lawn from your seed."**

For a successful lawn, your soil should be rich, and carefully pulverized, smoothed and leveled. If your soil requires it, fertilize it with well rotted manure, or other fertilizer. Then plant vigorous, dependable lawn grass seed early. Sow about 1 pound to 200 square feet. One pound is about 1½ quarts. Our Radium Mixture contains no timothy. Leaflet, "How To Make a Lawn," sent free upon request. **4526—RADIUM: ½ lb., 25c; lb., 44c; 2 lbs., 82c; 5 lbs., $2.00, postpaid. Not prepaid: 10 lbs., $3.80; 50 lbs., $18.50; 100 lbs., $36.00.**

SUPERIOR GRASS MIXTURE

A very good grade of grass seed, a little lower priced than Salzer's Radium Lawn Grass Mixture above. **Salzer's Superior Grass Seed is being sown in every state in the Union, under varied soil conditions, with splendid results.** This mixture produces a fine, healthy, green sward and will withstand hard usage. Miss Rose Hladilek, 5224 So. Whipple St., Chicago, Ill., writes, **"Enclosed find check for some more of your Lawn Grass Seed. I bought some from you last spring and the lawn is simply wonderful."** Use 1 lb. to 200 square feet. Contains no timothy. Order your Lawn Grass Seed from Salzer's this year and have the healthiest, most vigorous, most velvety and the greenest lawn that you have ever had! **4525—½ lb., 23c; lb., 40c; 2 lbs., 74c; 5 lbs., $1.80, postpaid. Not prepaid: 10 lbs., $3.40; 50 lbs., $16.50; 100 lbs., $32.00.**

GOLF GRASS MIXTURE

A putting green in your own yard! Prepared from a special formula, with the object of producing a thick turf of velvety smoothness. **The varieties comprising this mixture are all of the fine bladed, low growing and hardy grasses that maintain their rich green color throughout the season.** Wherever a billiard table smoothness is wanted, this mixture will give satisfaction. Mr. Travis Shaw, Bus. Mgr., The West Texas State Teachers College, Canyon, Texas, writes, **"We find your Golf Grass Mixture to be the most satisfactory grass we have ever tried in this country."** Contains no timothy. Use 1 lb. to 200 square feet. **4537—½ lb., 40c; lb., 75c; 2 lbs., $1.44; 5 lbs., $3.55, postpaid. Not prepaid: 10 lbs., $6.90; 50 lbs., $34.00; 100 lbs., $67.00.**

CREEPING BENT MIXTURE

A beautiful mixture, based on the Creeping Bents and mixed with the finest redeemed grasses, which, if properly cared for, will make an elegant lawn. In a lawn of this type it is imperative that the grass be kept cut short and well rolled throughout the season. Starvation of the plants is the most frequent cause of unsatisfactory lawns, and grass needs constant small applications of fertilizer and sufficient water. Use one pound to 200 square feet. It of course contains no timothy. **4538—½ lb., 47c; lb., 92c; 2 lbs., $1.78; 5 lbs., $4.40, postpaid. Not prepaid: 10 lbs., $8.60; 50 lbs., $42.50; 100 lbs., $84.00.**

CREEPING BENT

RHODE ISLAND BENT—For smooth, velvety lawns. Also known as Colonial Bent, Rhode Island Grass, Fine Agrostis, and Fine Bent. **4542—½ lb., 87c; lb., $1.65; 2 lbs., $3.20; 5 lbs., $7.90, postpaid. Not prepaid: 10 lbs., $15.50; 50 lbs., $77.50; 100 lbs., $154.00.**

SOUTH GERMAN MIXED BENT—A mixture of the above and other Bents, including Carpet Bent and Velvet Bent, hence highly desirable. **4502—½ lb., 75c; lb., $1.45; 2 lbs., $2.80; 5 lbs., $6.90, postpaid. Not prepaid: 10 lbs., $13.50; 50 lbs., $65.00; 100 lbs., $129.00.**

DWARF WHITE DUTCH CLOVER

While we do not put White Clover in our Lawn Grass Seed, we have many requests for it and recommend one ounce to each pound of lawn seed. Our Special Lawn Mixture always contains the right percentage of White Dutch Clover. **4249—Radium, per oz., 7c; ¼ lb., 17c; lb., 54c; 2 lbs., $1.00; 5 lbs., $2.35, postpaid.**

DISEASE RESISTANT COPENHAGEN MARKET CABBAGE

Home growers and gardeners perhaps experience more trouble in growing cabbage successfully than any other vegetable, which in practically every case is directly traceable to cabbage sick soil. As a remedy we commend this type. Try this strain along-side of any other; thus getting first hand proof of its disease resistant ability.

DOUBLE GOLDEN GLEAM

Salzer's New Double Sweet Scented Nasturtium

Something new in Nasturtiums that will delight all flower lovers! Large, golden yellow flowers, double and semi-double, that average two and one-half to three inches across, and which are borne in the greatest profusion on erect, stiff stems six inches in length, carrying the beautiful flowers well above the foliage. The plant forms a vigorous large bush which throws out short runners, averaging eighteen inches, and when in full bloom, the entire plant, including the runners, is a blaze of color. Salzer's Double Golden Gleam is very easily grown.

Salzer's Double Golden Gleam Nasturtium is deliciously sweet scented and an ordinary sized bouquet of these lovely double flowers will quickly fill the room with their fragrance. Wherever exhibited it has created a sensation. Golden Gleam Nasturtium was awarded a Gold Medal at the 1931 Atlantic City Flower Show. Semi-trailing type. Hardy annual. Order early. 2227—Pkt. of 35 seeds, 25c; 2 Pkts., 45c; 3 Pkts., 60c; ⅛ oz., $1.25; ¼ oz., $2.25, postpaid.
